User interface

1. Authorization

For the first entry to the portal, the client will receive a welcome letter indicating the login (e-mail) and password to enter. After the first authorization, the client immediately goes to the password change page, where he must enter and confirm the new password. After changing the password, the client needs to re-authorize with the login (e-mail) and a new password.

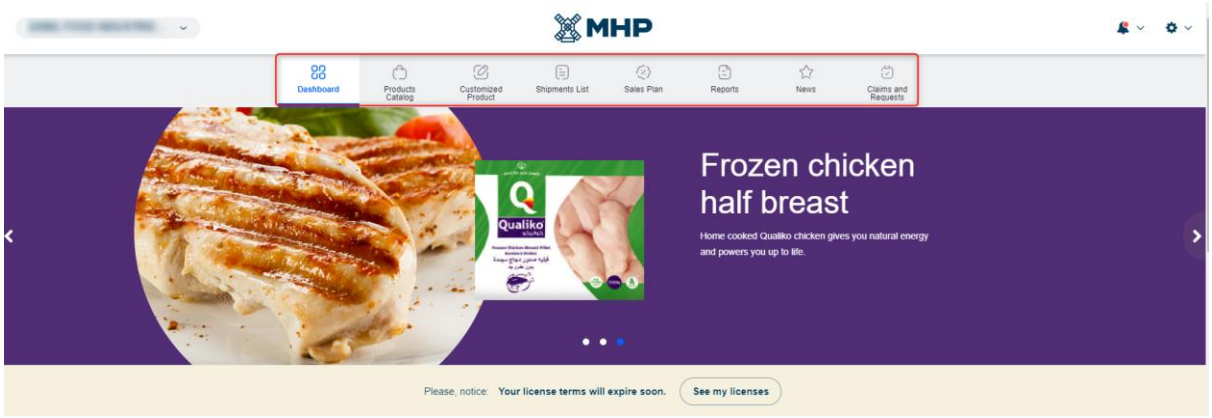

On the authorization page, users have the option to reset their passwords. The password can be reset by using the email used for authorization.

2. Header menu

After successful authorization, the client goes to the Dashboard page. The client sees menu items:

- Dashboard - transfer to the dashboard page on click
- Products Catalog - transfer to products catalog page on click
- Customized Product - transfer to customized product page on click
- Shipments List - transfer to shipments list page on click
- Sales Plan - transfer to sales plan page on click
- Reports - transfer to reports page on click
- News - transfer to news page on click

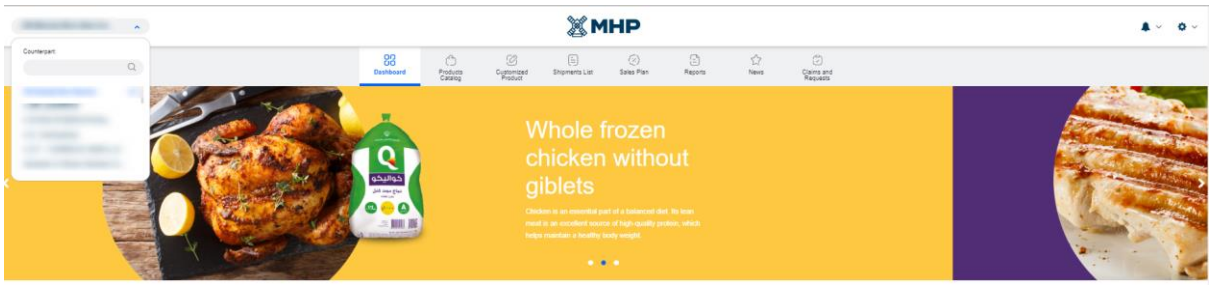

- Claims and Requests - transfer to request page after click

3. Header

3.1 Drop-down list with related companies

If the client has related companies, he can view them in the drop-down list with related companies (in the header on the left). The client can go to the desired company by simply clicking on it. After switching to another company, the client will see all the data of this company.

3.2 Notifications

When the client clicks on the "bell", a context menu of messages for the client appears.

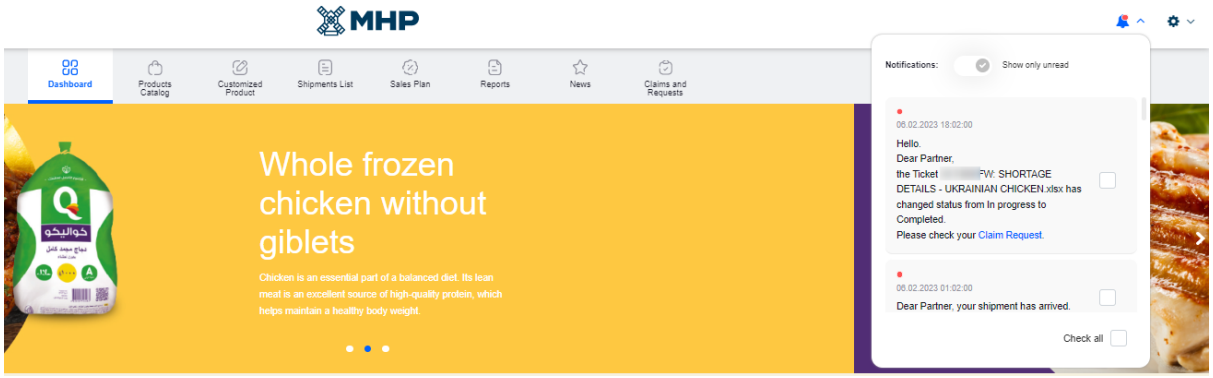

Types of messages that may receive:

- a message about changing the status of an application for a custom product
- request registration and status change
- notification about the arrival of the delivery (2 weeks before the arrival and at the time when the delivery has arrived)
- license updates

Available actions for the client:

- mark a specific message as read

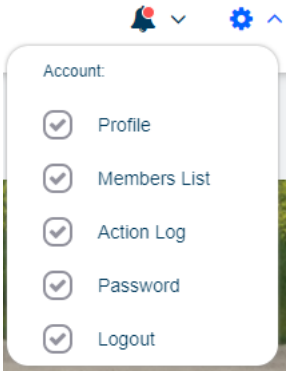

- mark all messages as read
- filtering of unread messages

3.3 Settings menu

By clicking on the "settings menu", the user can go to the following pages:

- Profile
- Members Lists
- Licenses (if the user’s country is Saudi Arabia)
- Action Log
- Change the password
- Logout

4. Profile

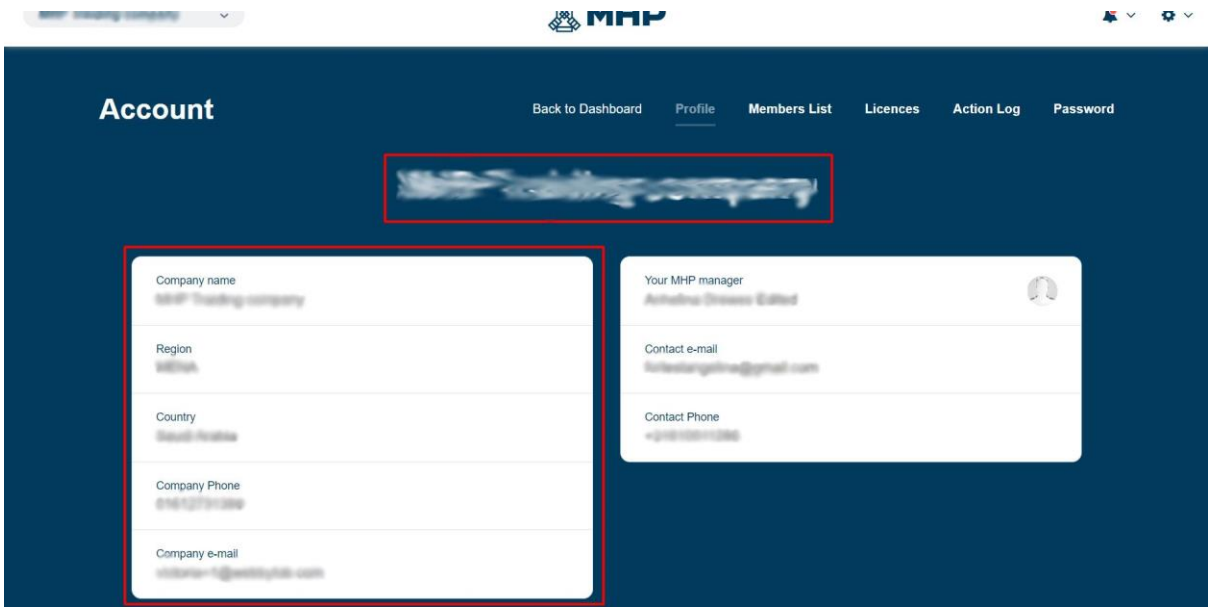

The user can go to the page of his personal data, so he needs to click on the "settings menu" and select "Profile" from the drop-down list.

4.1 Company information

The name of the company is displayed on the page, user can see data about his company on the Profile

- Company name

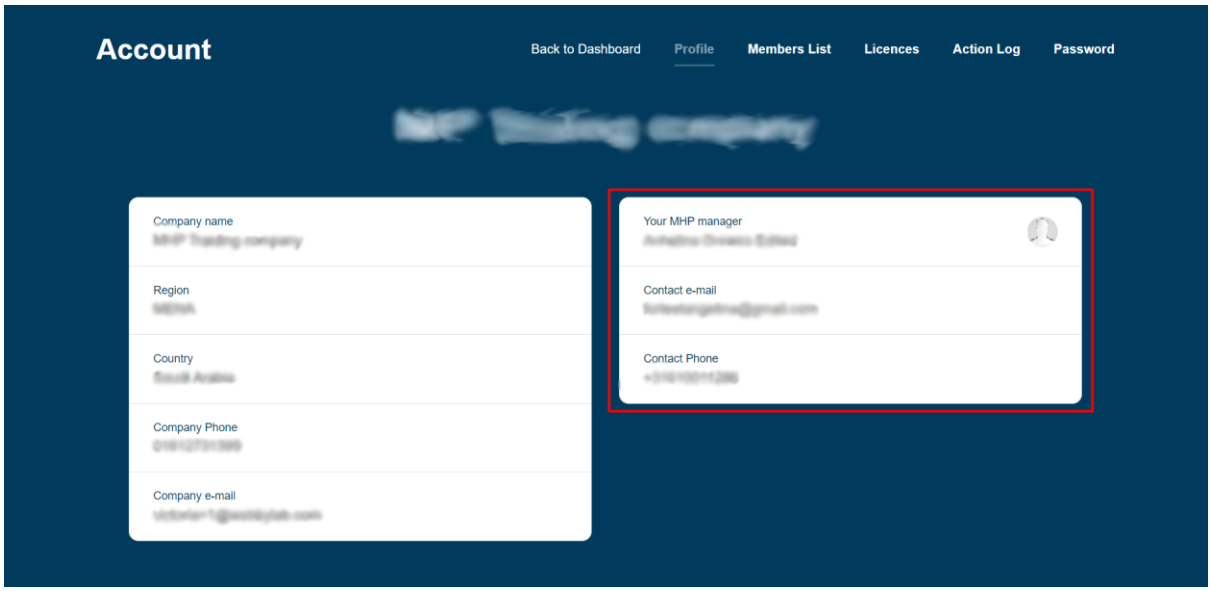

- Region
- Country
- Company telephone
- Company e-mail

4.2 Contact info

The user can see MHP manager contact info on the Profile page:

- MHP manager name
- Contact e-mail
- Contact telephone

4.3 Related Companies

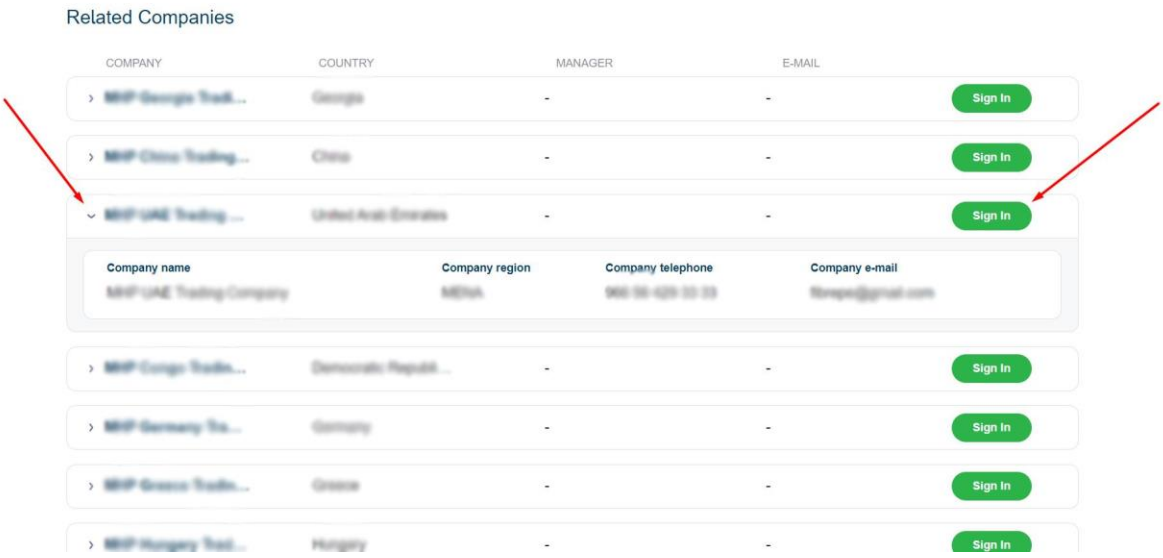

By scrolling down, the user can see related companies, which are displayed if the user has related companies. In the table of related companies, the user sees the following information about the companies:

- COMPANY
- COUNTRY
- MANAGER
- MANAGER E-MAIL

By clicking on the “arrow”, the user can see additional information about the company:

- Company name
- Company region
- Company telephone
- Company e-mail

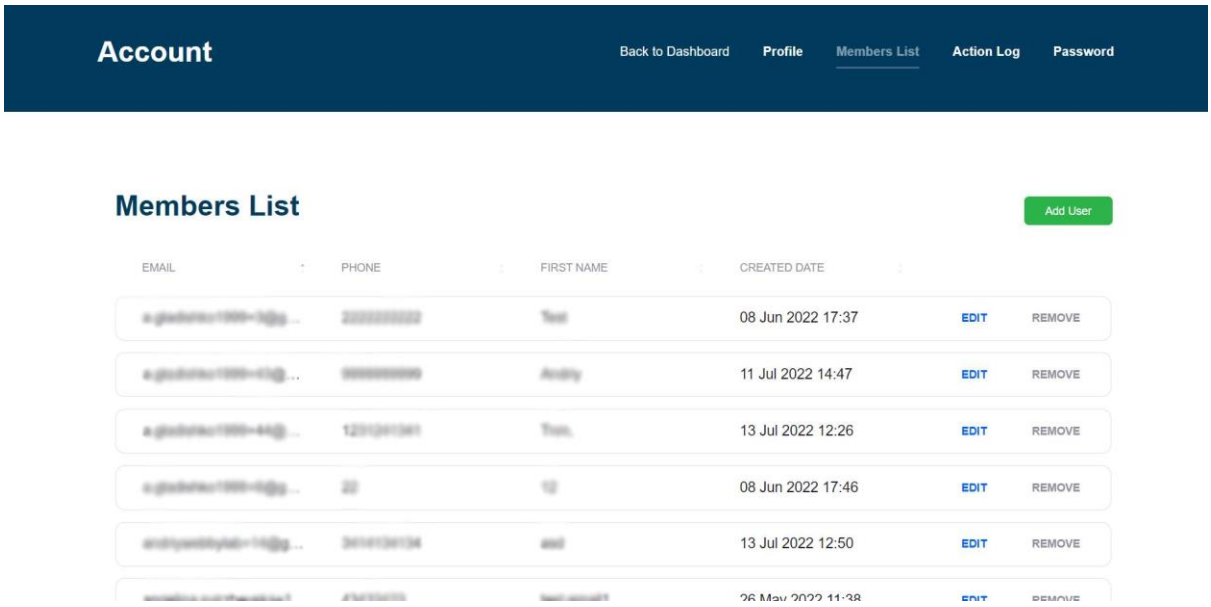

On the right side of the table is located the "Sign in" button, the client can go to the desired company by simply clicking on this button. After switching to another company, the client will see all the data of this company.

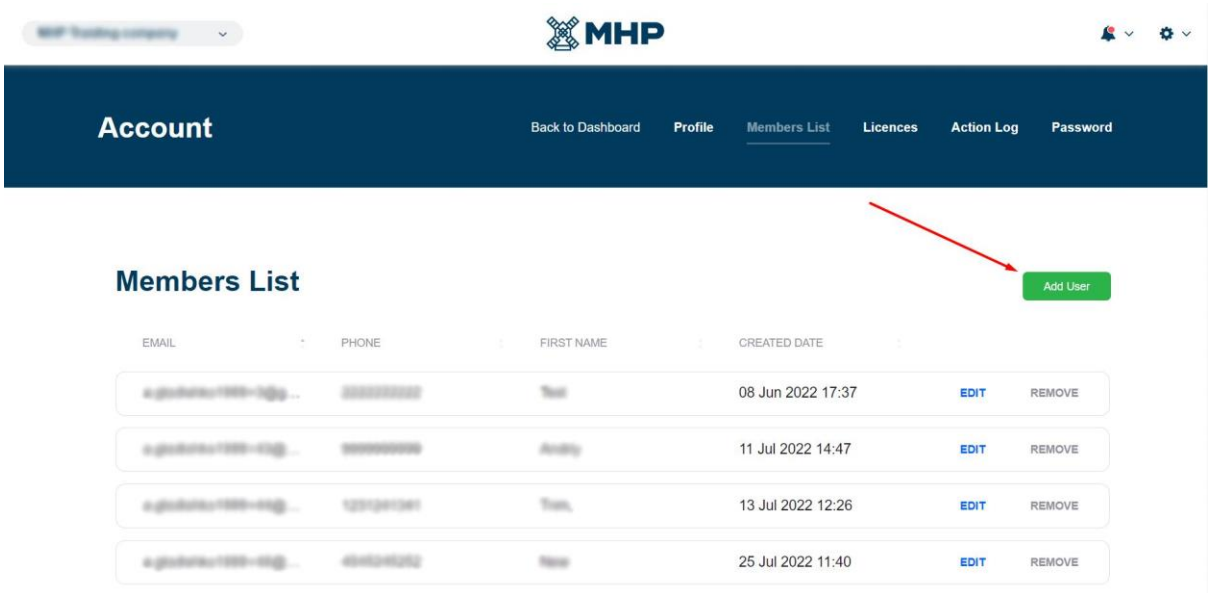

5. Members List

On the “Members List” page are displayed all users belonging to the parent company. The customer can view the table of users. The following information is displayed in the user table:

- EMAIL
- PHONE
- FIRST NAME
- CREATED DATE

The customer can create an additional user for his company, for this he needs to click on the “Add User” button.

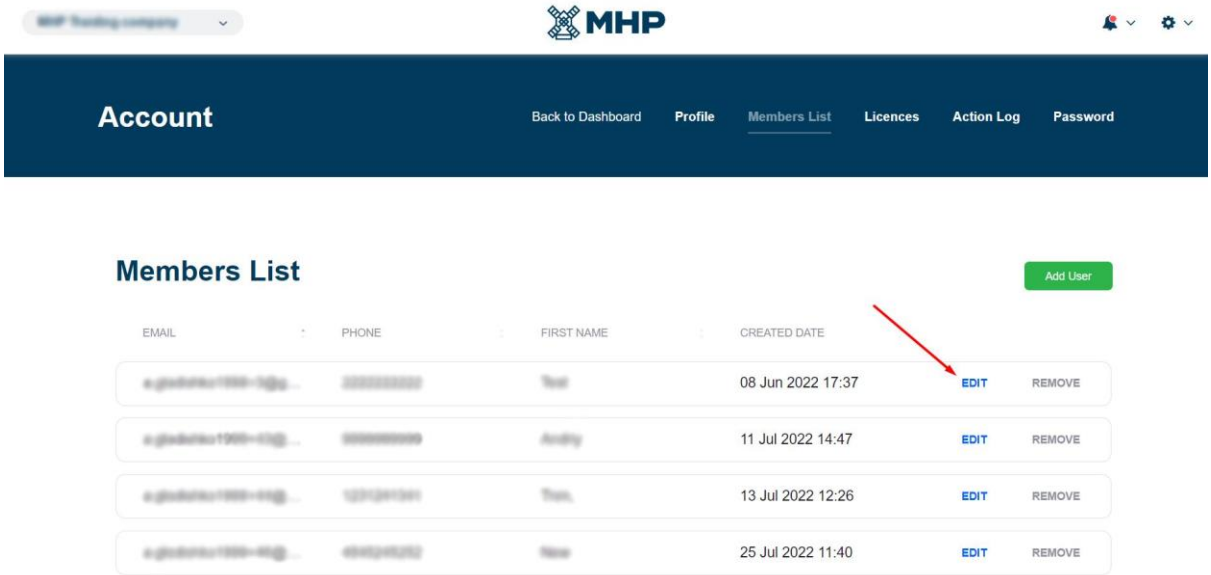

On the page for creating a user, the customer needs to fill in the user data. And in the form on the right side, put check boxes to the appropriate settings and permissions, and click the “Save” button.

After that, the created user will appear in the members list.

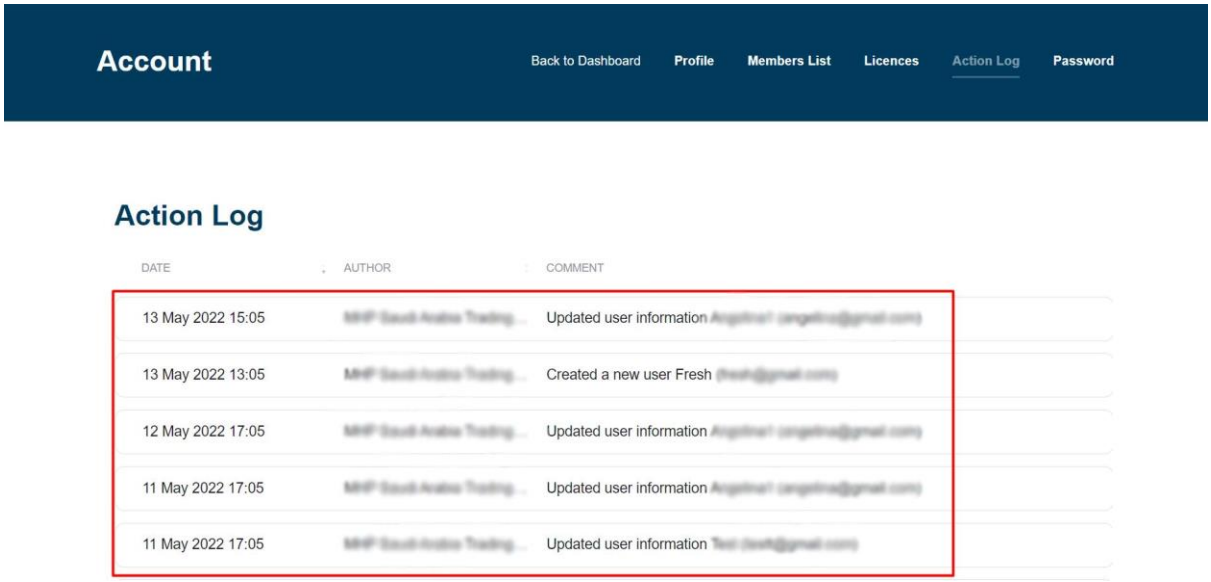

The customer can also edit a previously created user. To do this, he needs to select a user from the table and click the "Edit" button. Next, you need to edit the required fields and click "Save"

6. Action Log

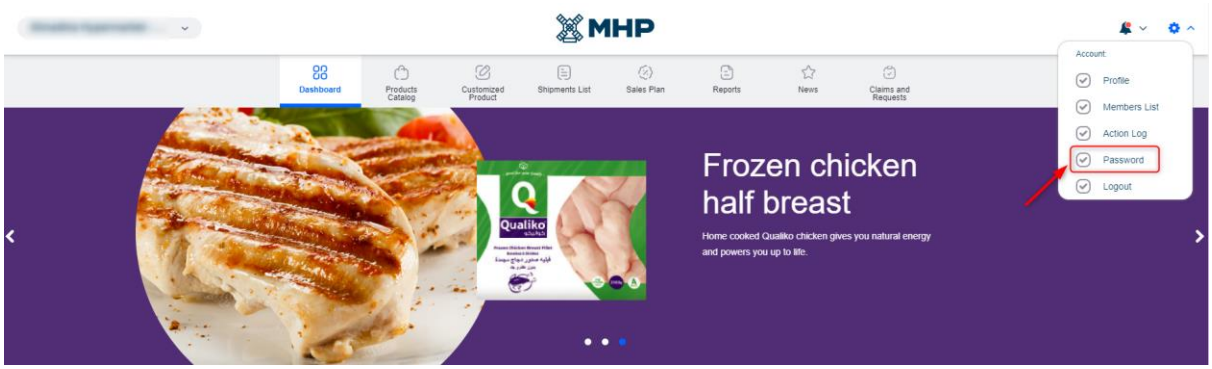

On this page, the customer can see the actions performed with users on the "Members List" page (i.e. adding, editing or deleting a user). The following information is displayed in the logs table:

- DATE
- AUTHOR
- COMMENT

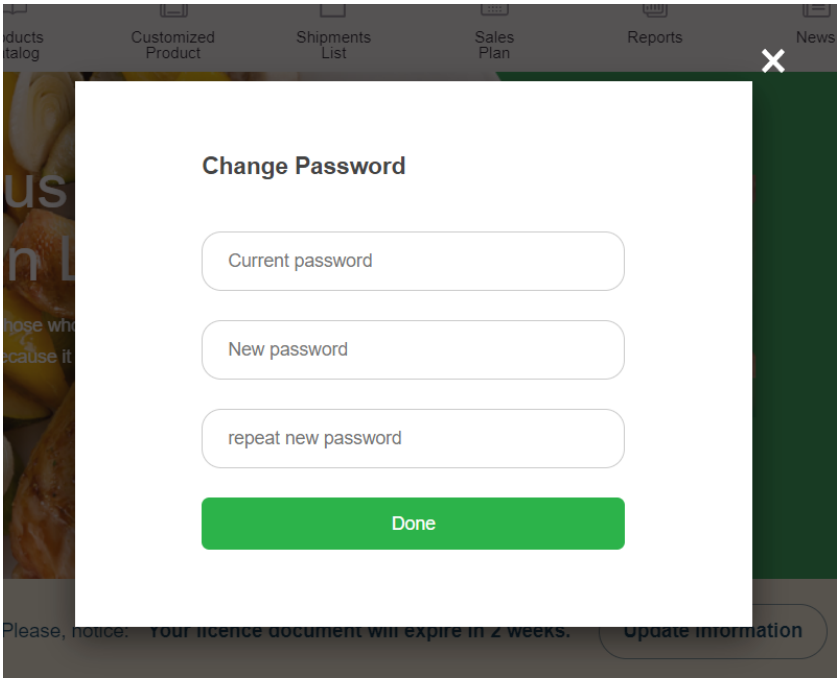

7. Password change

The client can change the password by clicking on the context menu of his personal profile in the upper right corner and selecting the "Password" link in the drop-down list.

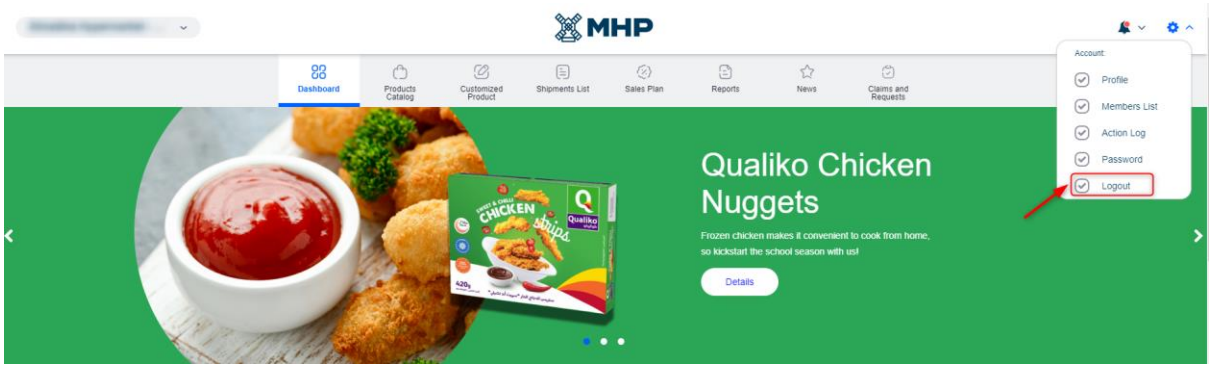

A modal window will open to change the password. The client needs to enter the current password, new password and confirm the new password.

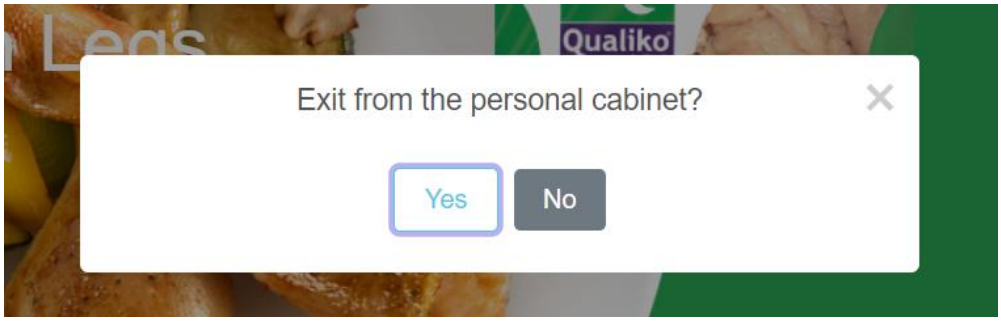

8. Exit from the personal cabinet

The user needs to click on the “Logout” in the context menu, in the upper right corner, to exit your personal account.

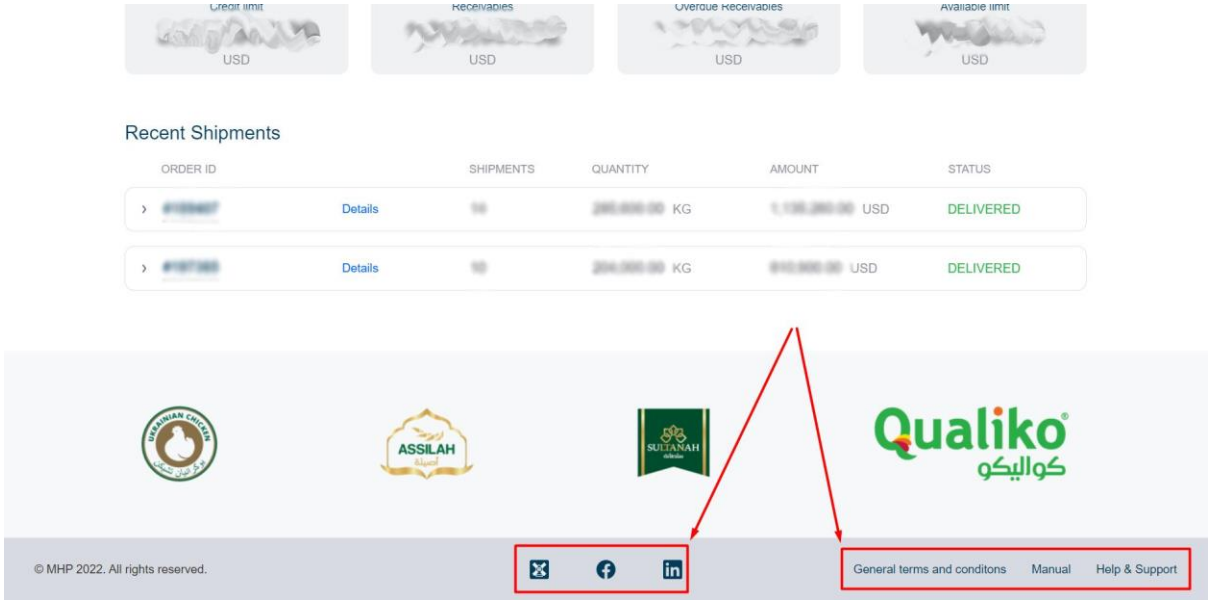

In the modal window that opens, confirm the exit by clicking the “Yes” button.

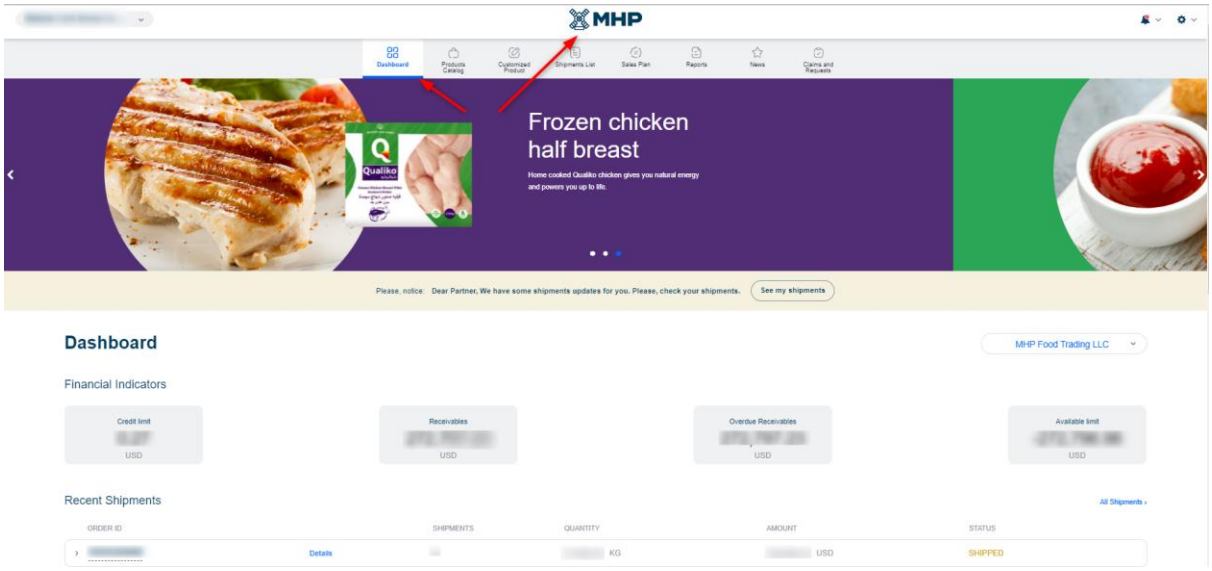

9. Footer

Links for the social MHP networks, terms and conditions, user manual and technical requests and complaints are available in the footer section.

10. Dashboard

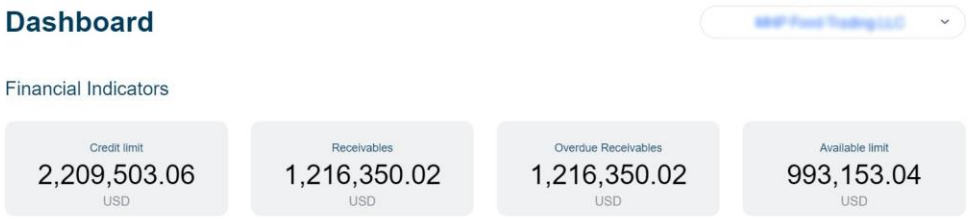

The user gets to the dashboard after successful authorization. If the user is on any other page, he can go to the dashboard page by clicking on the Dashboard item in the header menu or clicking on the MHP logo.

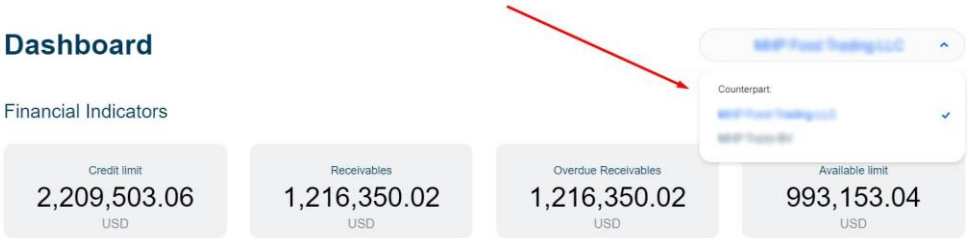

10.1 Financial Indicators

The user can see financial indicators on the dashboard:

- Credit limit
- Receivables
- Overdue receivables
- Available limit

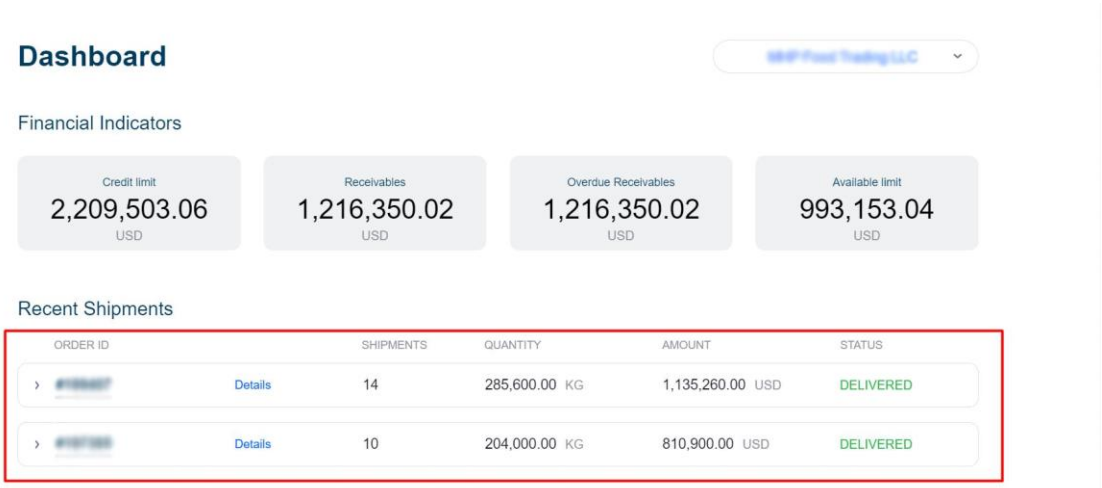

Customers can have multiple sales organizations. The customer needs to click on the selector with the displayed sales organization and select the required organization from the drop-down list to choose financial indicators for an appropriate sales organization.

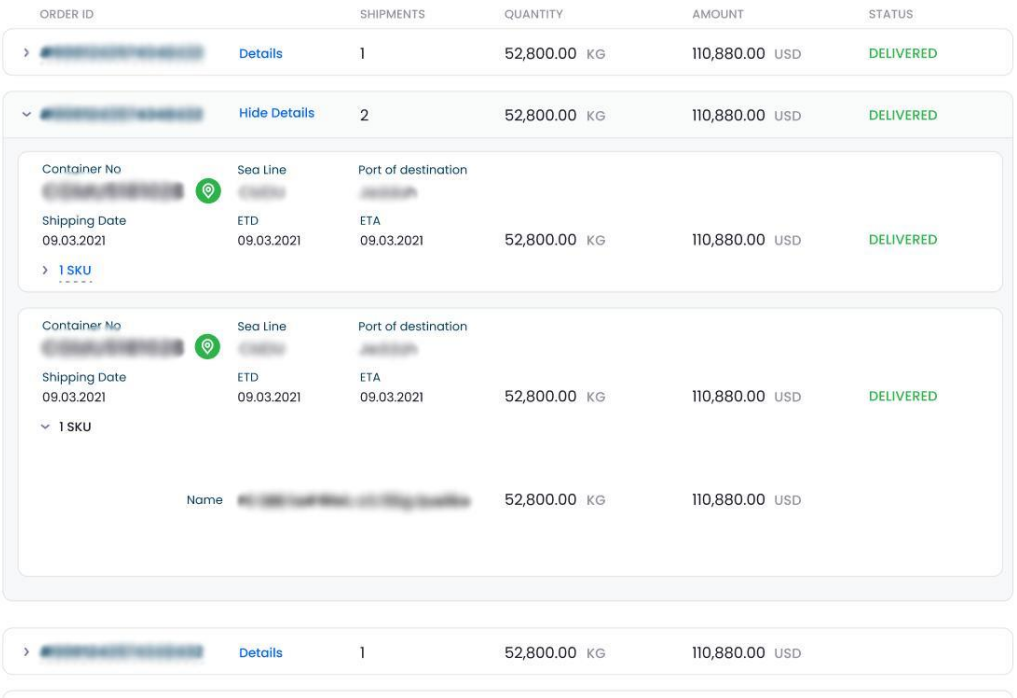

10.2 Recent Shipments

The dashboard displays shipments for the last 3 months, to view shipments for a longer period, go to the Shipments List tab. The following information is displayed in the recent shipments table:

- ORDER ID
- SHIPMENTS
- QUANTITY
- AMOUNT
- STATUS

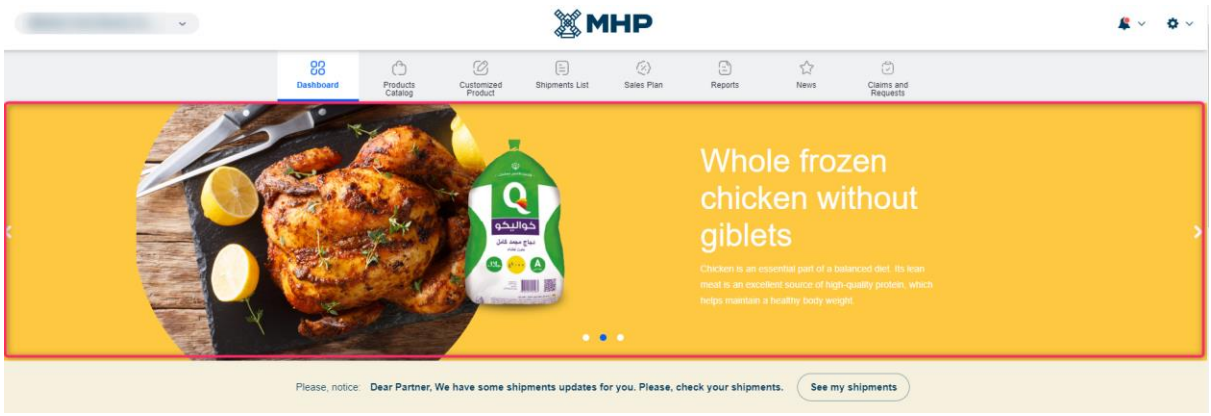

The customer can see more information about orders by clicking on the “Details” button.

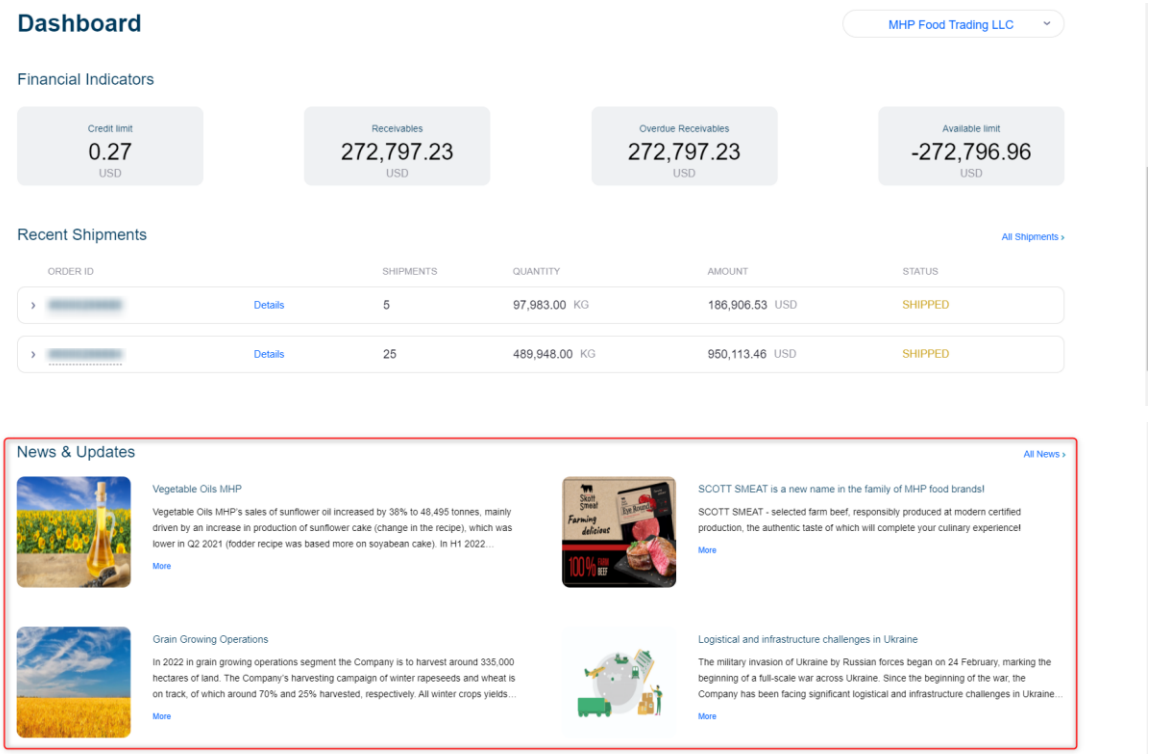

10.3 News and Slider

A slider can be displayed on the dashboard

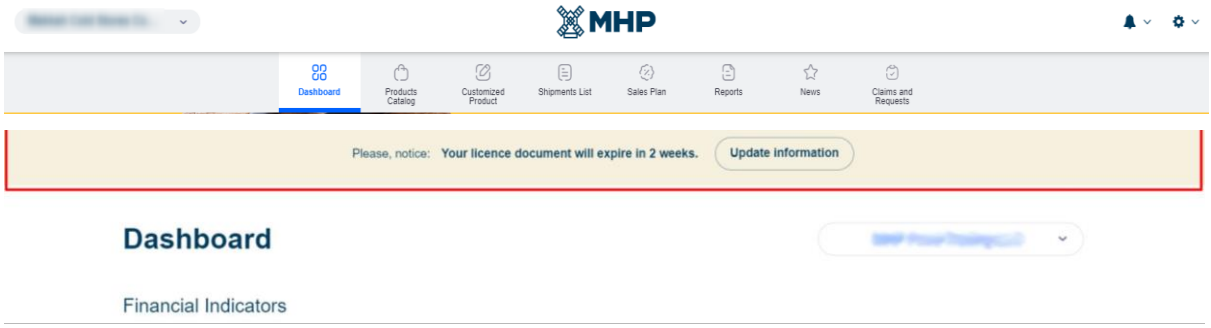

The dashboard also displays four latest news items.

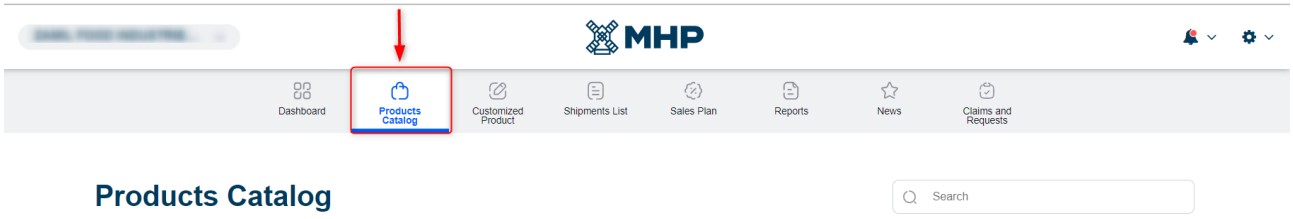

10.4 Licenses

If the customer license expires, a message will be displayed on the dashboard under the slider, after clicking on "See my licenses" the customer will go to the licenses page

11. Products Catalog

To get acquainted with samples of products the company presents, the user must select the "Product Catalog" section:

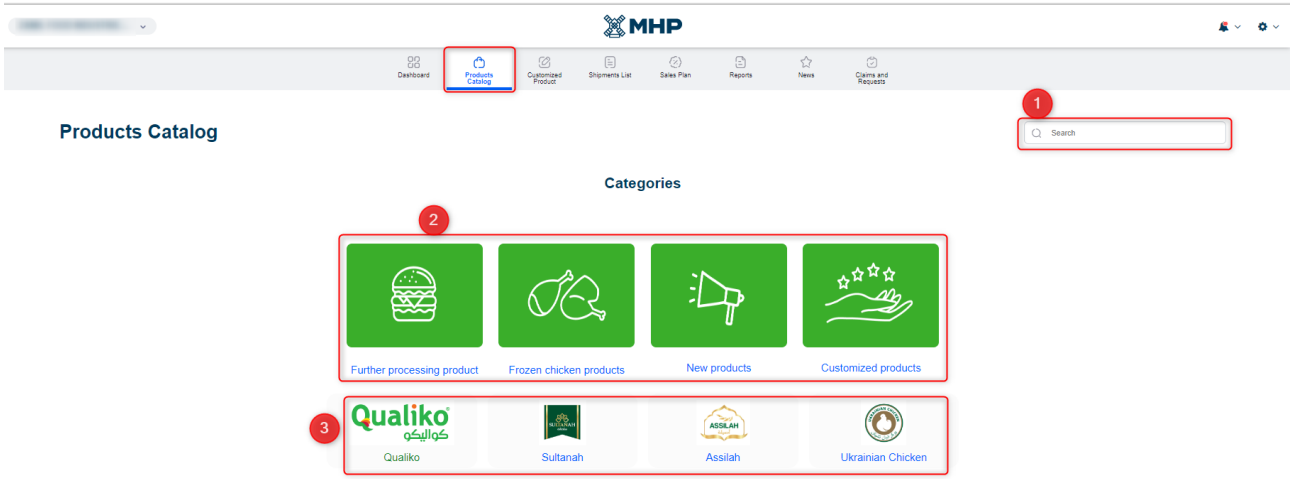

On the main page of the section:

1. Using the search field, you can find the desired product (whether it is presented on the portal)

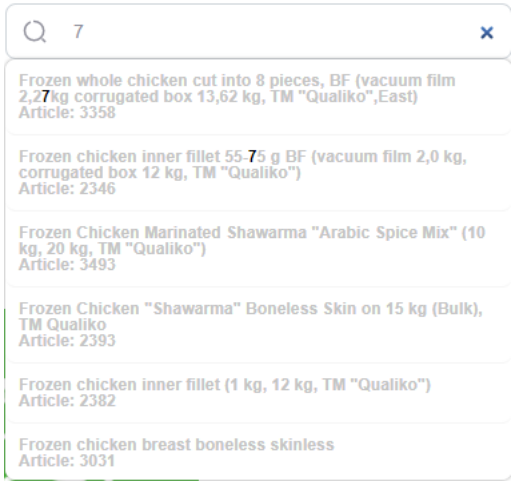

2. Browse products according to the categories they belong to.

3. Get acquainted with the list of brands presented by the company.

Attention: the presented list of products and their characteristics are incomplete.Check the details with the manager.

When using the search field, it is sufficient to start entering the first characters of the query to be found, and possible options appear on the screen:

The search window works exclusively inside the section.

Select a product in the search field, the page is updated, which displays a sample of products, a sample of packaging, you can also view more detailed information about the parameters of freezing, storage, dimensions of transport packaging.

To view products, click on one of the Categories blocks :

- ✓ Further processing product
- ✓ Frozen chicken products
- ✓ New products
- ✓ Customized products

During technical work on the portal and development of catalog pages, a message will be displayed when clicking on a block: "This part is under development».

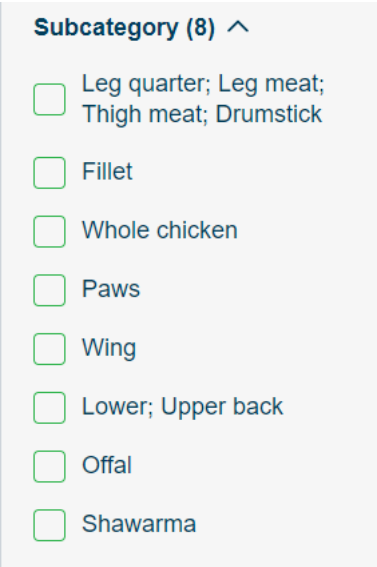

For the convenience of viewing products in the catalog, a filter block is implemented:

Category

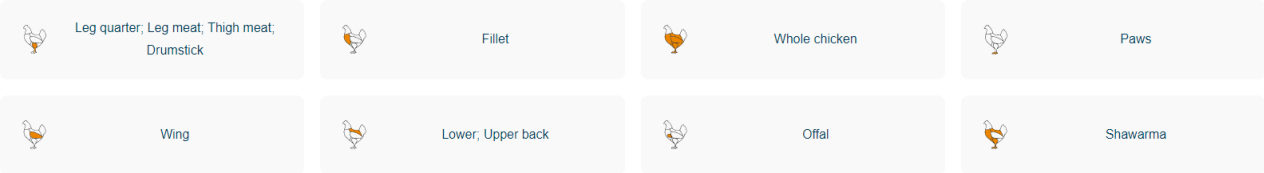

Subcategory

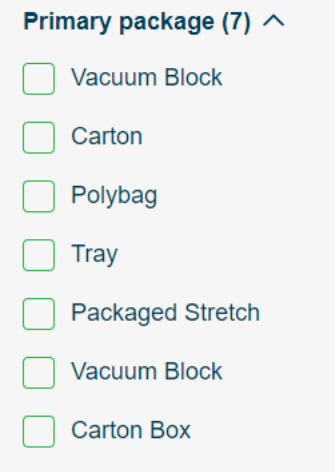

The total number of subcategories depends on the selected category

Subcategories are also displayed at the top of the page and are active filters:

Primary package

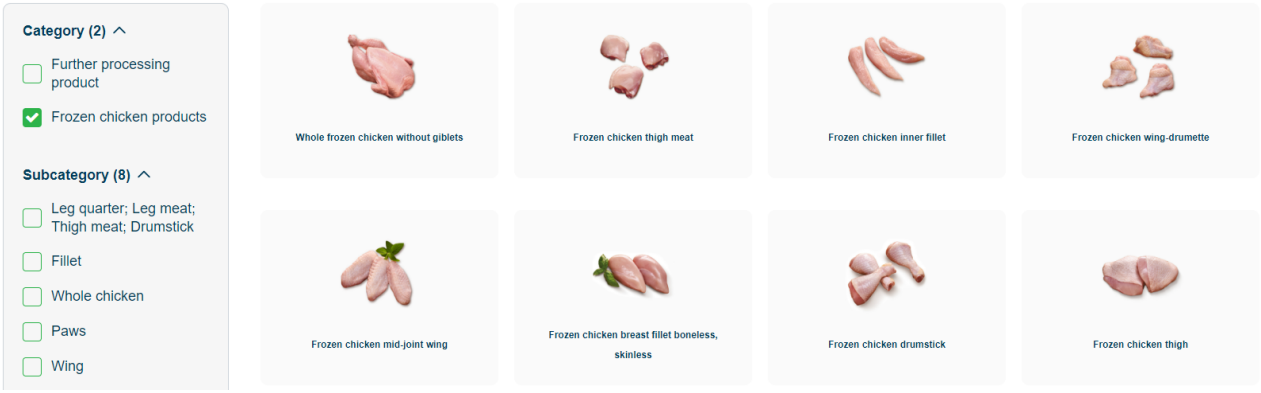

Product State

Filters can be used simultaneously to search for the required products.

When applying filters, the page is updated.

After refreshing the page, available product cards are displayed in the middle according to the applied filter:

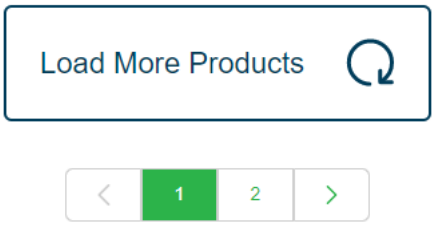

On the page, it is possible to change the display order of products from a tile to a list:

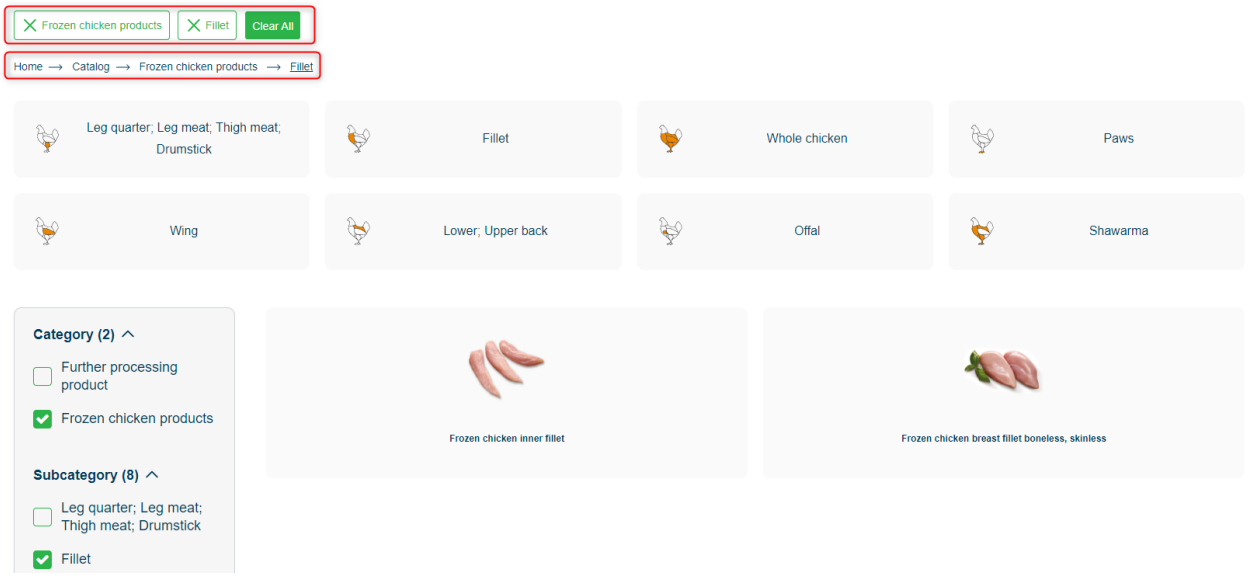

It is possible to set the number of products on the page: 12, 24, All.

At the bottom of the page, you can switch between pages and load more products for viewing:

If necessary, it is possible to view product cards by applying a more detailed set of filters to view products.

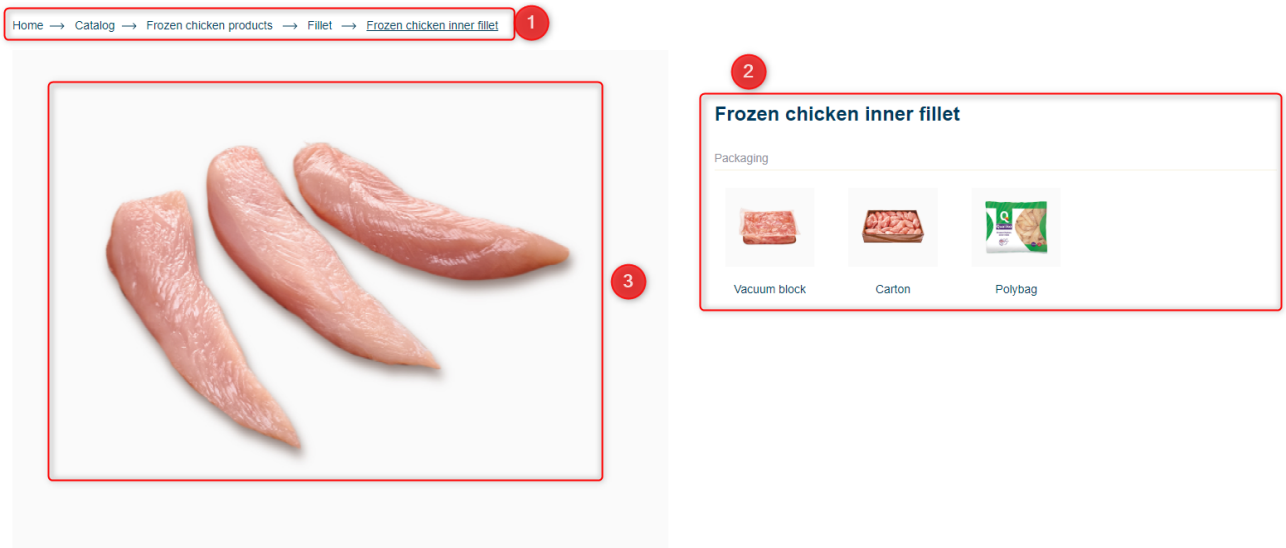

It is possible to remove all filters, change them and return to the previous page using the controls at the top of the page.

After making sure that the necessary filtering is applied, click on the product card.

After the update, the pages are available for viewing:

1. Switch between pages, to return to the previous pages
2. Examples of packaging
3. Product sample

The page contains a list of more detailed information about the selected product:

Description

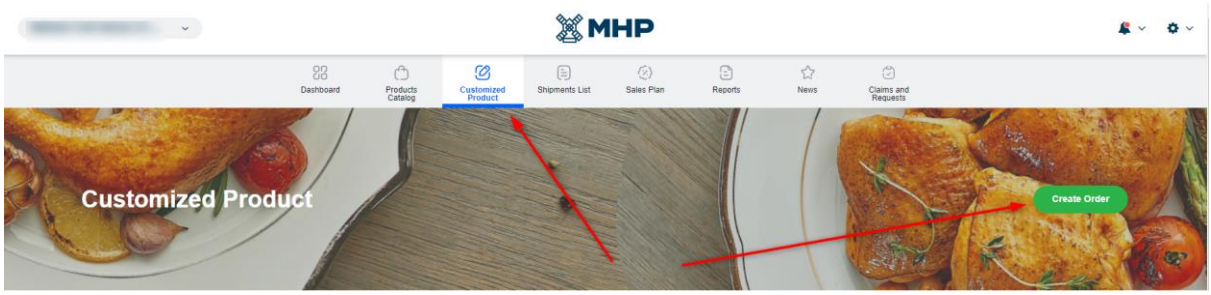

SKU	Nett weight	Primary package	Cut size	Packages per carton	Carton weight	Carton dimensions	Shelf life months	Storage conditions	Freezing type
7257	2 KG	Vacuum block	55-75 g	6	12 KG	583x392x119	12	not higher -18°C	BF
7468	1 KG	Polybag	Uncalibrated	12	12 KG	590x391x138	12	not higher -18°C	IQF
6777	2 KG	Vacuum block	36-64g	4	8 KG	590x391x89	12	not higher -18°C	BQF
538	14 KG	Carton	Uncalibrated	1	14 KG	569x383x159	12	not higher -18°C	IQF

The catalog does not contain all products available for order, and is advertising material.

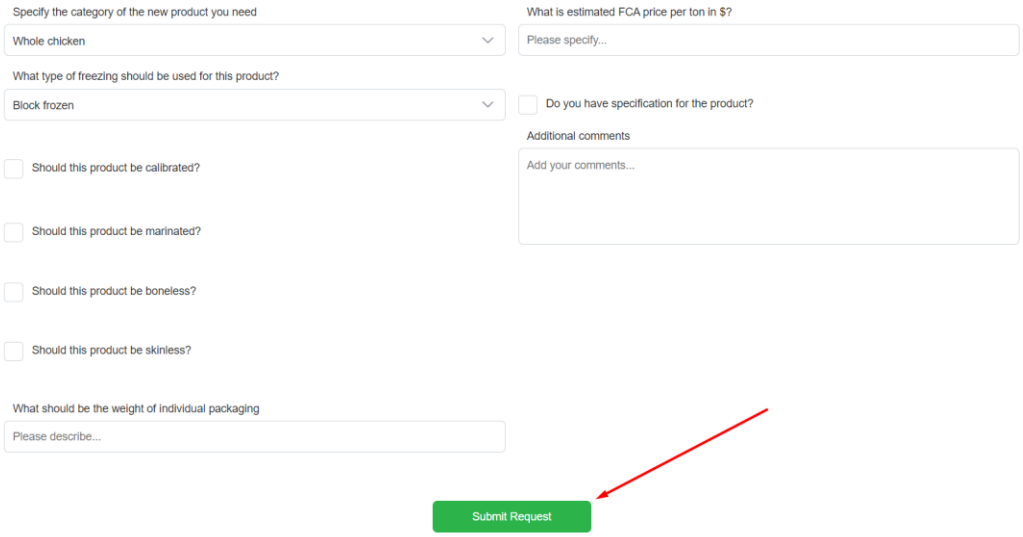

For details and to order, contact your manager.

12. Customized Product

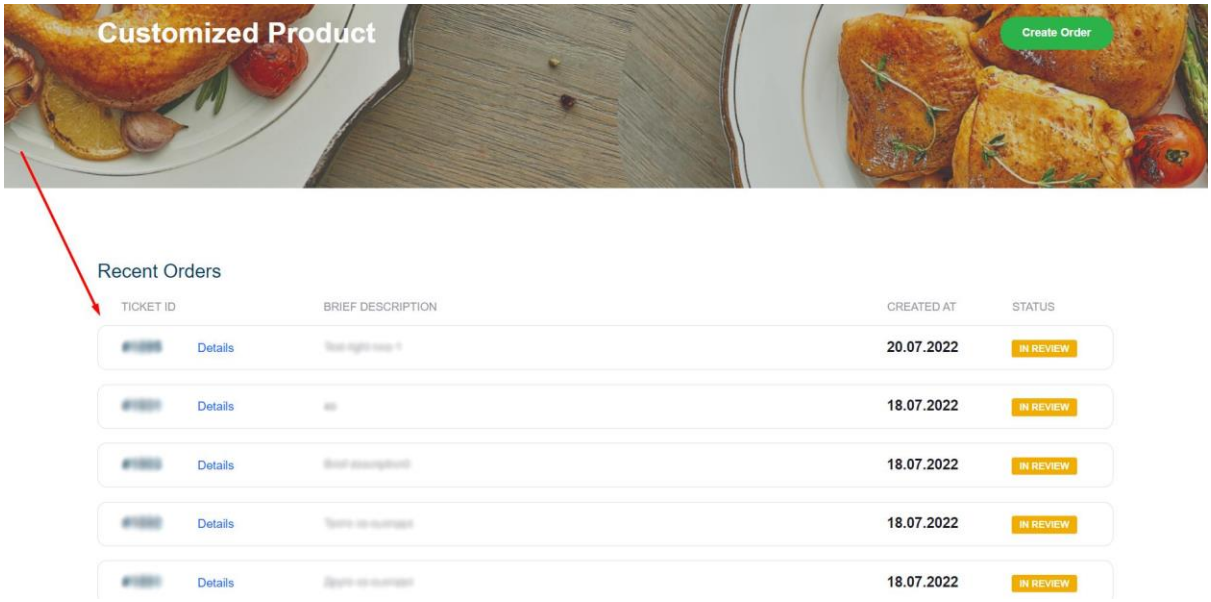

On the "Customized Product" page, the customer can create a request for his customized product. He needs to go to the page and click the “Create Order” button to create a request.

On the page for creating a customized product, the customer needs to fill in all the necessary fields and click the “Submit Request” button.

The customized product request is successfully submitted and is displayed in the custom product request table.

Status:

In Review - the request is under consideration by the Sales Department;

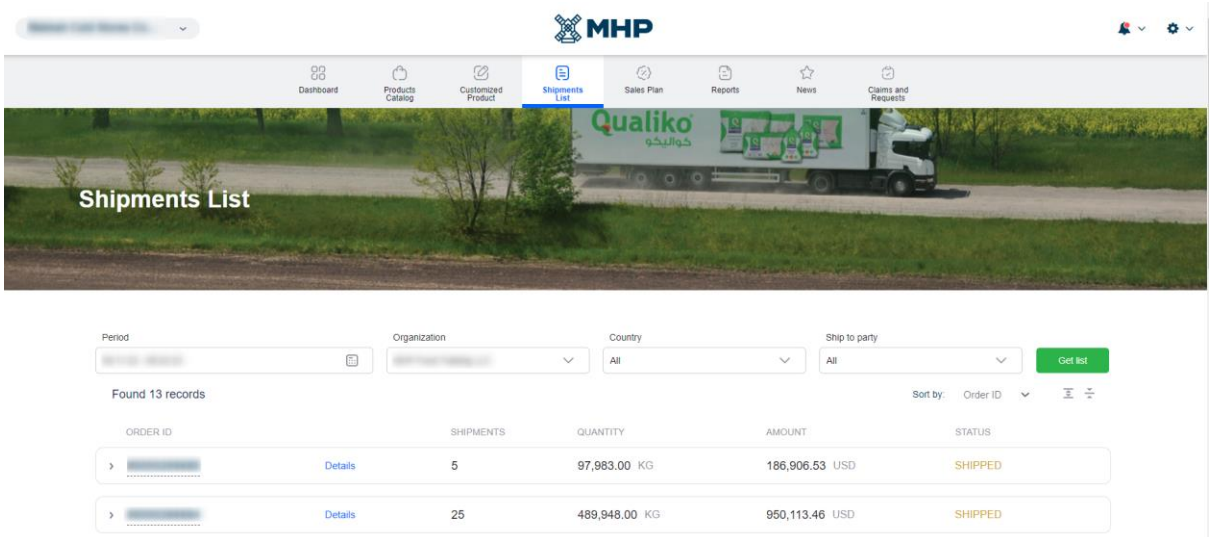

Analysis - request is under consideration by R&D and production department;

Accepted - request accepted, the product will be produced;

Declined - request declined, the product will not be produced;

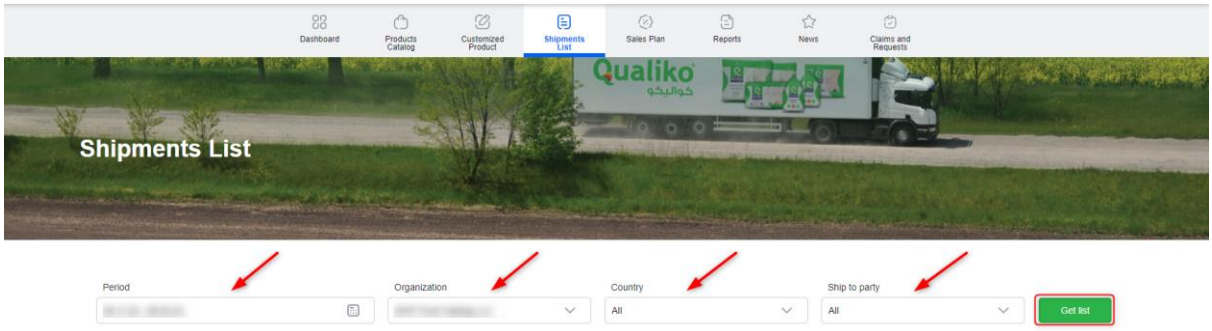

13. Shipments list

The client can see shipments history on the Shipments list page.

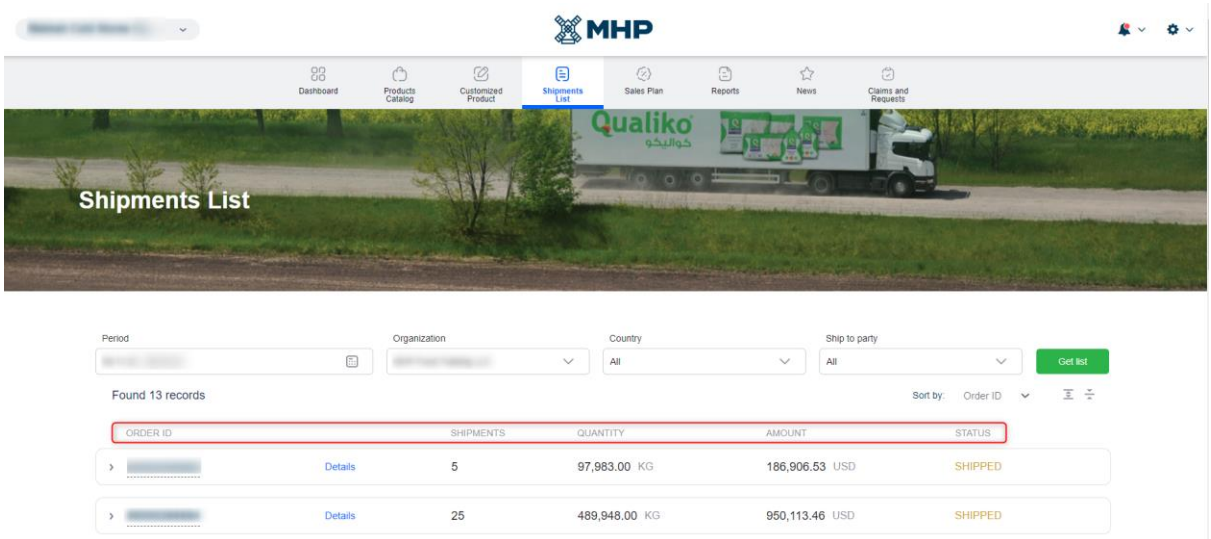

- The shipment history is loaded for the last three months by default.
- The customer can specify the period of shipments history in the Period field.

- The user needs to choose the required organization from the drop-down list to view shipments history for an appropriate sales organization.
- The user needs to choose the required country from the drop-down list to view shipments history for a specific country.
- The user needs to choose the required ship to party from the drop-down list to view shipments history for a specific ship to party.
- The user will see the filtering results after selecting all the necessary filters and clicking on the “Get list” button.

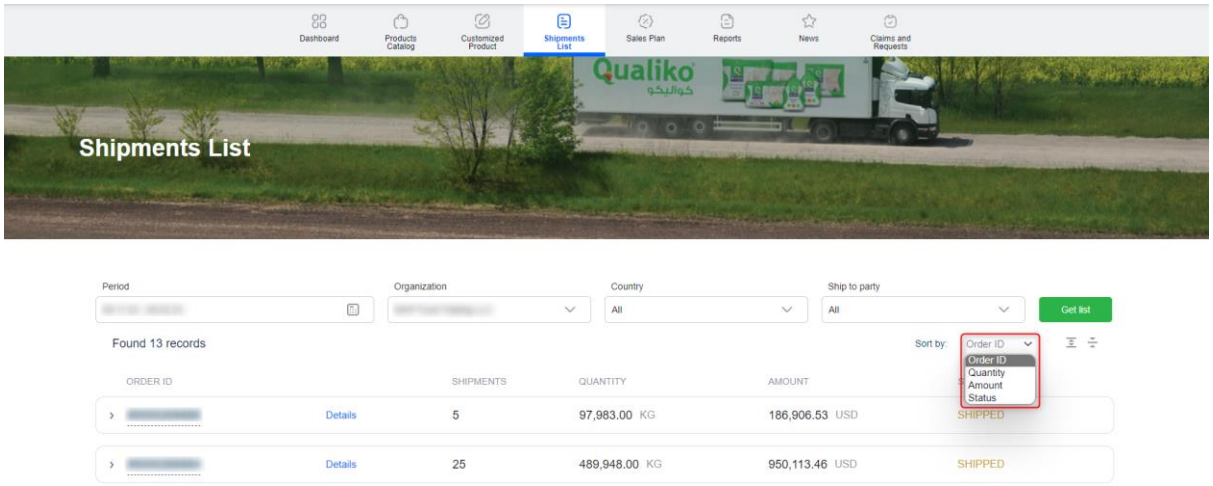

The user can see the following information on the shipments list table:

- Order ID
- Shipments
- Quantity
- Amount
- Status

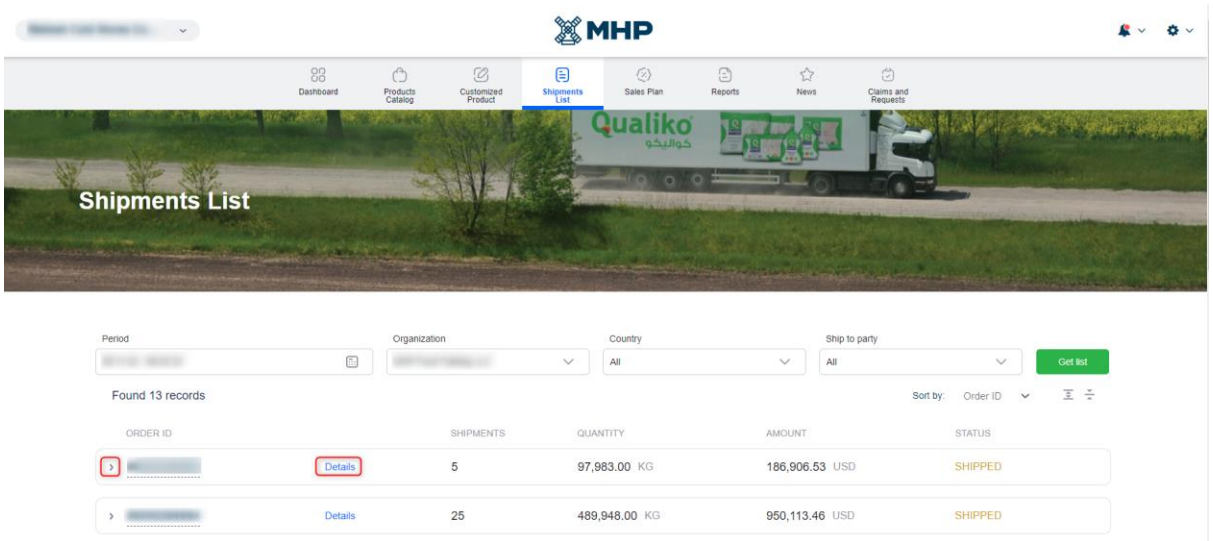

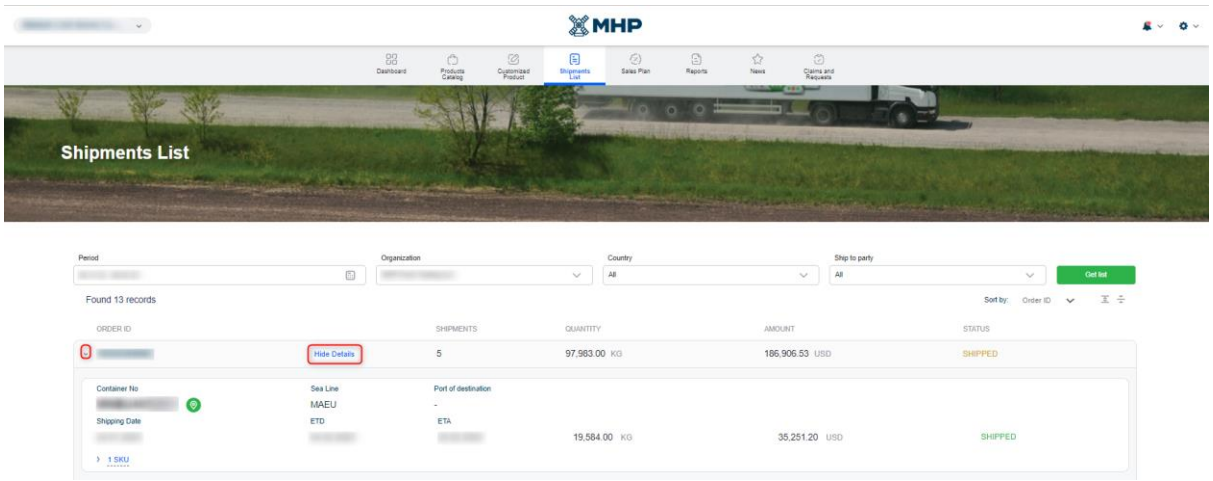

Shipments are sorted by order ID by default.

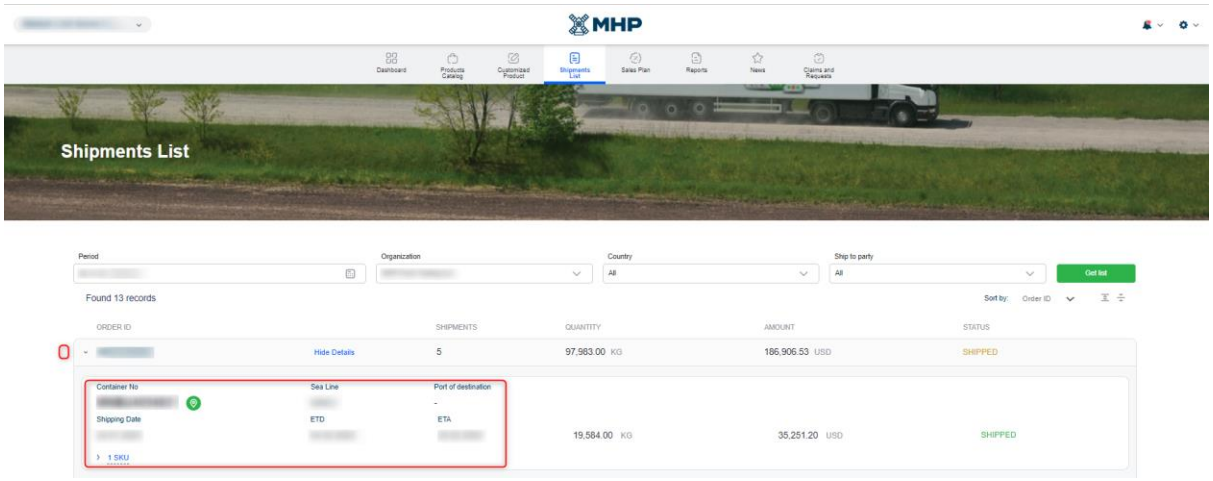

The list can be sorted by other characteristics, which are available in the drop-down:

- Quantity
- Amount
- Status

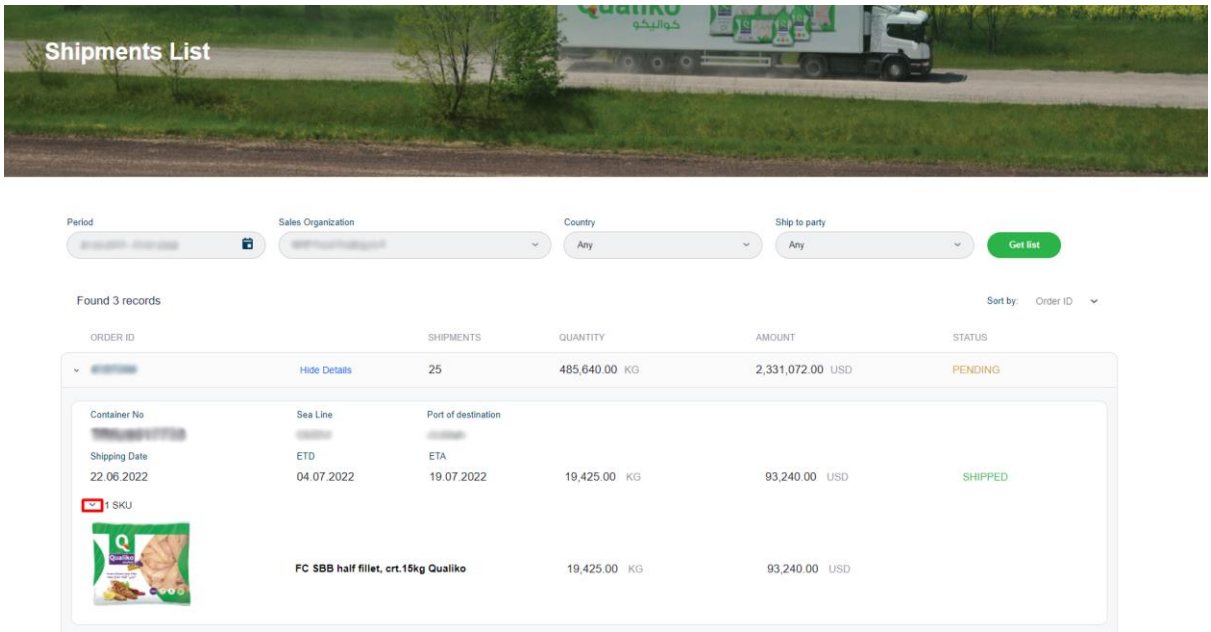

The user can view more information about specific delivery in "Shipments List" by clicking on the "arrow" icon or button “Details”.

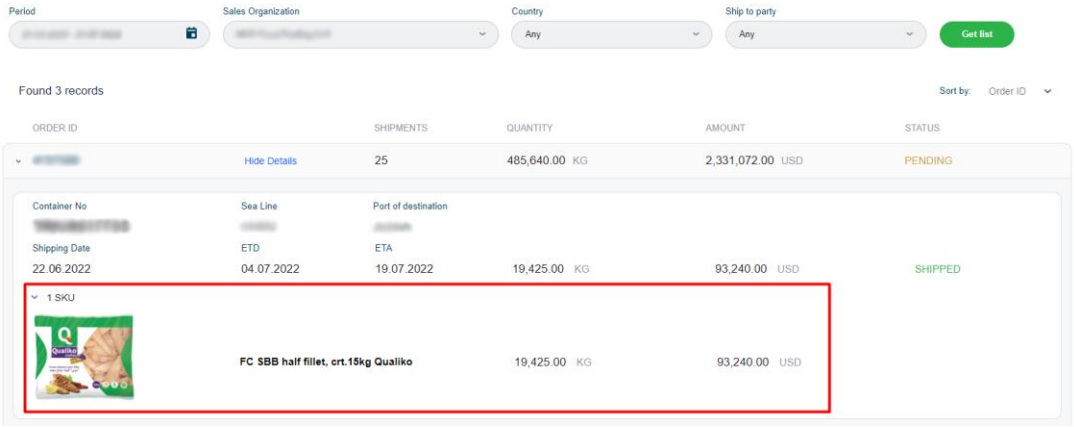

The user can see the following additional information on the expanded list of shipments:

- Container No
- Sea Line
- Port of destination
- Shipping Date
- ETD
- ETA

Each shipment can also be expanded by clicking on the “arrow” icon, and information about the product in this shipment can be viewed.

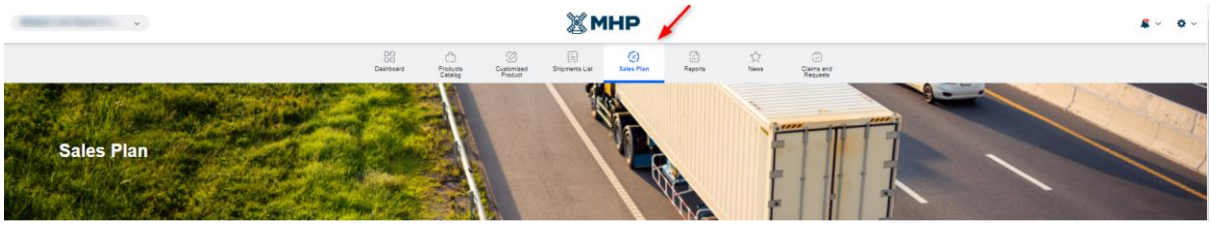

Information about the product:

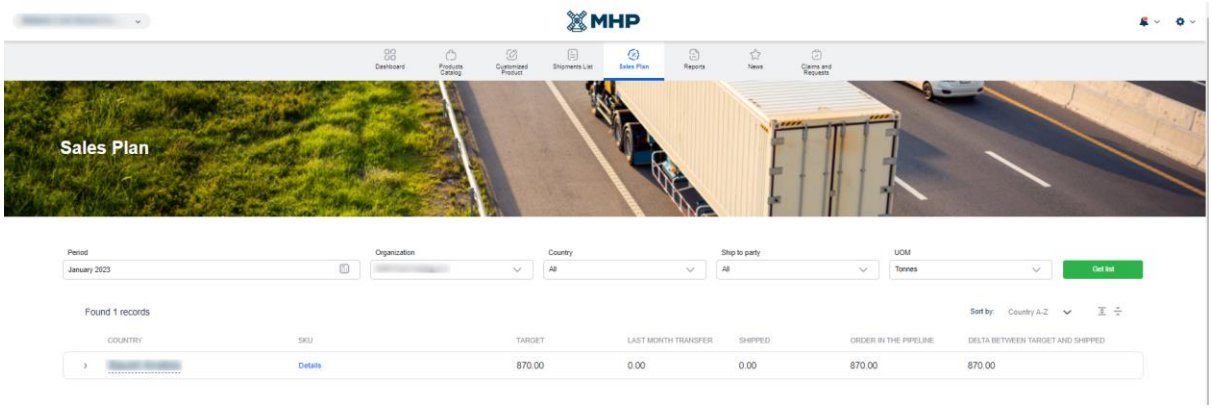

- Name
- Quantity
- Amount

14. Sales Plan

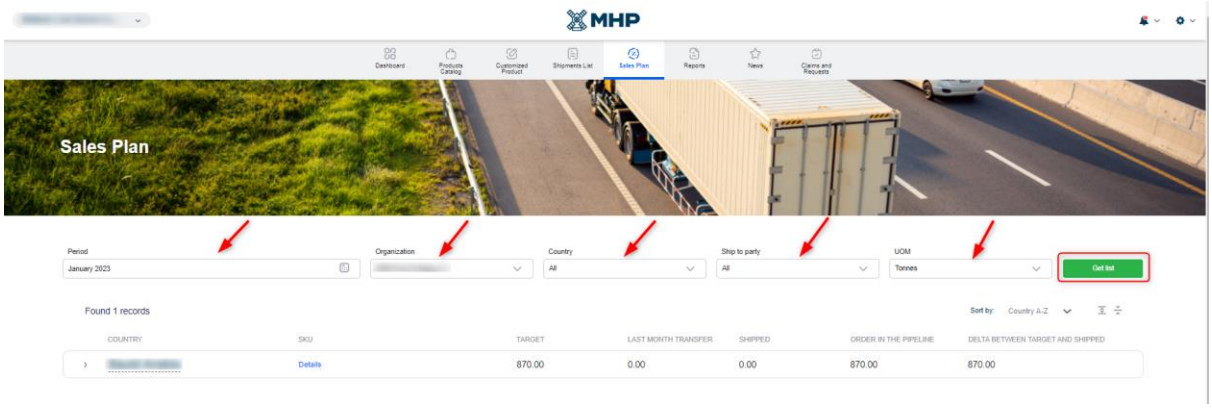

The client needs to select the appropriate menu item in the header menu to go to the Sales plan page.

The client can see the sales plan on the “Sales plan” page.

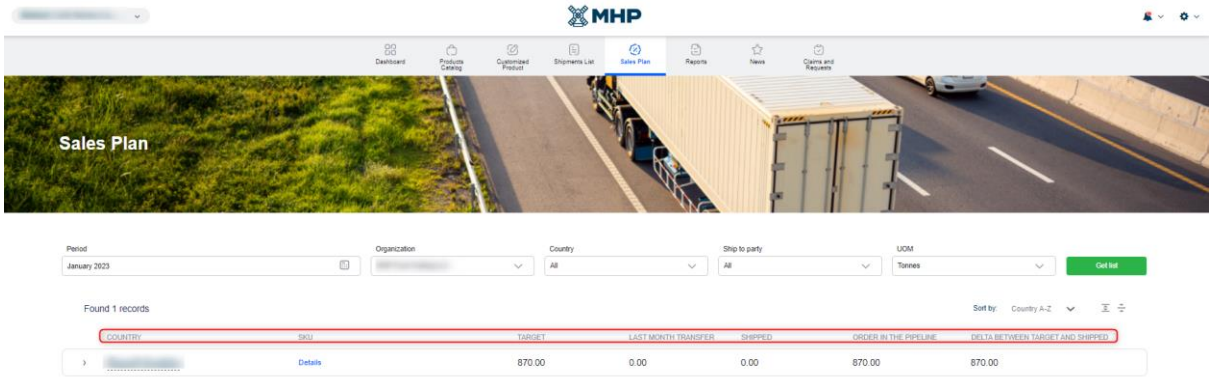

- The sales plan history is loaded for the current month/year by default.
- The customer can specify the month/year of sales plan history in the “Month” and “Year” fields.
- The user needs to choose the required organization from the drop-down list to view a sales plan for an appropriate sales organization.
- To view a sales plan for a specific country, the user needs to choose the required country from the drop-down list.
- To view a sales plan for a specific ship to party, the user needs to choose the required ship to party from the drop-down list.
- To view a sales plan in a required UOM (tonnes or currency), the user needs to choose the UOM from the drop-down list.
- The user will see the filtering results after selecting all the necessary filters and clicking on the “Get list” button.

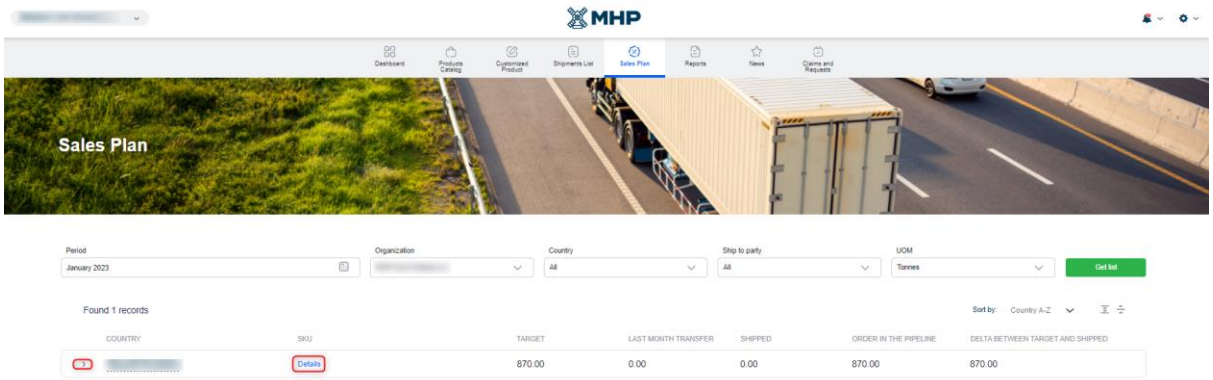

The user can see the following information on the sales plan table:

- Country
- SKU
- Target
- Last month balance

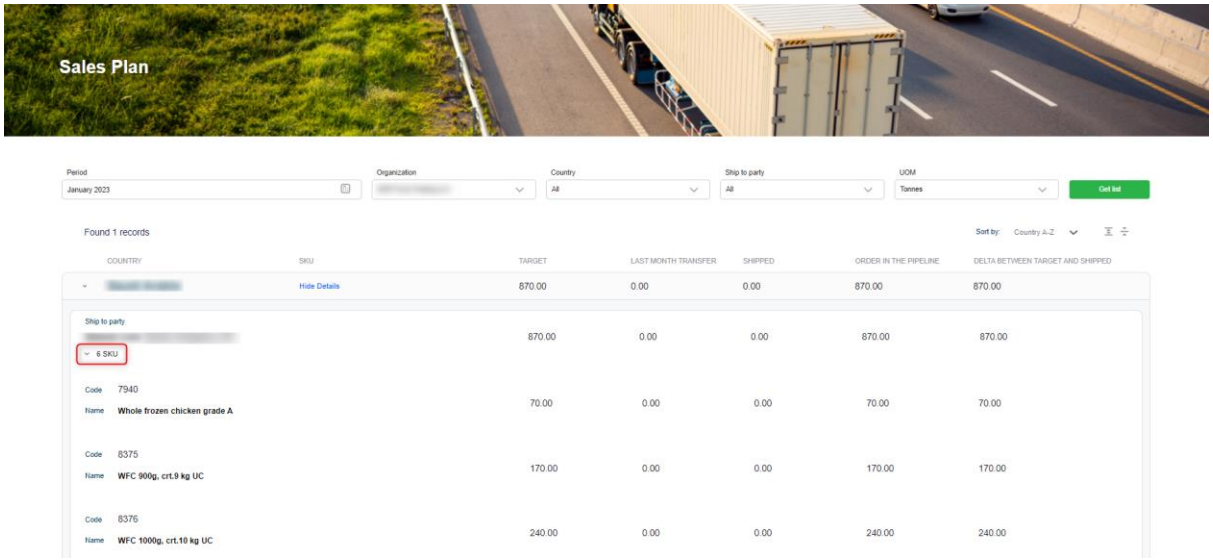

- Shipped
- Order in the pipeline
- Delta between target and shipped

The Sales plan is grouped by Country. The list of ships to party in the country can be viewed if a specific country is expanded by clicking on the “arrow” icon or button “Details”.

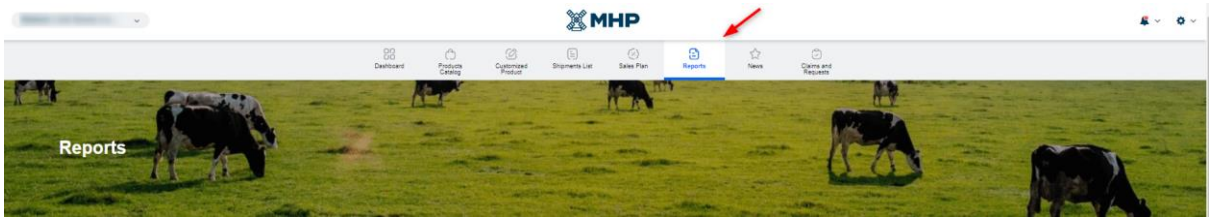

Each ship to party can also be expanded by clicking on the “arrow" icon and information about the specific ship to party can be viewed.

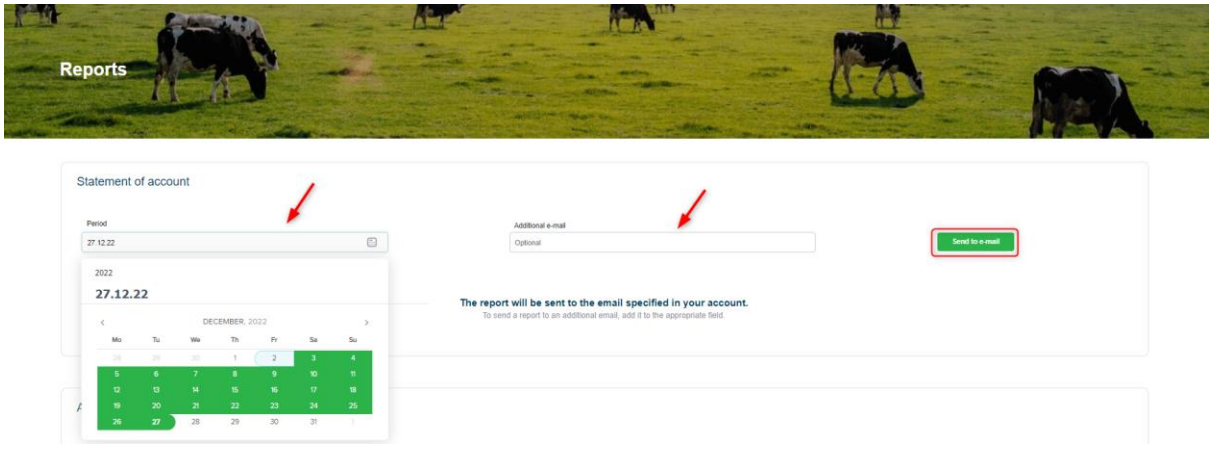

15. Reports

To go to the Reports generating page, the user needs to select the appropriate menu item in the header menu.

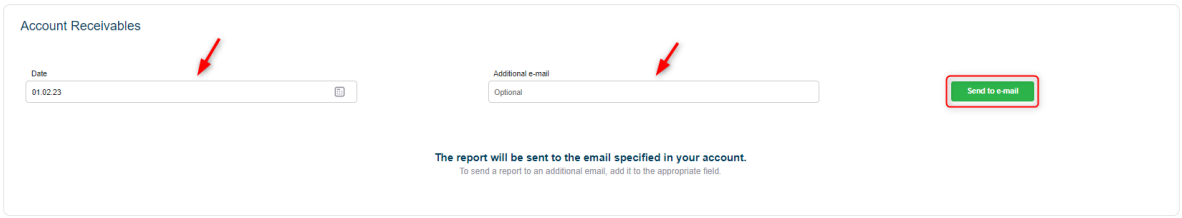

15.1 Statement of account report

To request the Statement of account report generating, the client needs select the period for which he wants to receive the report in the Period field, and click on the “Send to e-mail” button. If the user wants to receive a report by e-mail, which is not tied to his account, he can enter an additional e-mail in the “Additional e-mail” field.

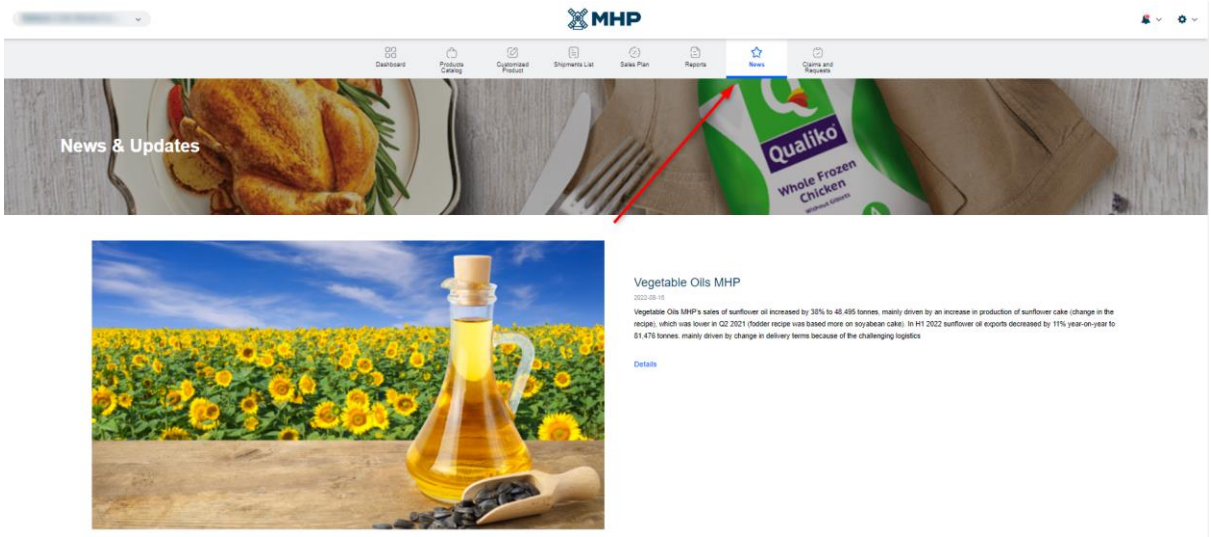

15.2 Account receivables report

To request the Accounts receivables report generating, the client needs select the date for which he wants to receive the report in the Period field, and click on the “Send to e-mail” button. If the user wants to receive a report by e-mail, which is not tied to his account, he can enter an additional e-mail in the “Additional e-mail” field.

16. News

The customer can see news and updates on the MHP, by going to the news page

To view details about the news, the customer needs to select the desired news and click on the "Details" button.

We have made it to London at the IFE - International Food & Drink Event happening until tomorrow

2022-07-18

The standard chunk of Lorem Ipsum used since the 1500s is reproduced below for those interested. Sections 1.10.32 and 1.10.33 from "de Finibus Bonorum et Malorum" by Cicero are also reproduced in their exact original form, accompanied by English versions from the 1914 translation by H. Rackham.

Details

To exit the news page, the user needs to scroll down the news and press the "Back to News" button

MHP may disclose Your Personal Data to the following third-parties:

Service providers. These are external companies whose services MHP uses to conduct business (for example, to process payments, detect fraud and verify counterparties, maintain a website, external audit, market research, support, advertising, web development, data analysis, accounting, etc.). Service providers and their individual employees have access to and the ability to use Personal Data on behalf of MHP only to perform specific tasks that they were required to perform basing on MHP instructions, and they are required to maintain the confidentiality and security of Your Personal Data.

Credit agencies / credit bureaus. To the extent permitted by applicable law, statistical reporting agencies and credit bureaus are external counterparties that MHP may use to verify Your creditworthiness (particularly for subscription operations) or to collect debt.

Third-party recipients who may receive Personal Data through a merger or acquisition. MHP reserves the right to disclose Your Personal Data to third-parties for reasons that may be of a different legal nature or in the context of a merger or acquisition with other companies.

17. Claims and Requests

To create a request for information on products, certificates and to create a claim, the user needs to select the Claims and Requests section.

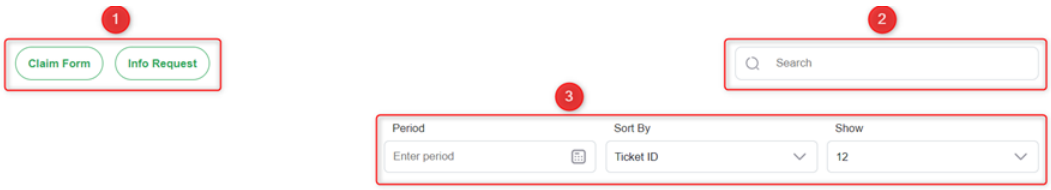

On the main page of the section:

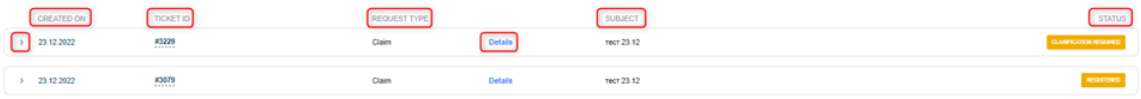

1. It is possible to choose the required request form

2. Find a previously created request\complaint by number or name

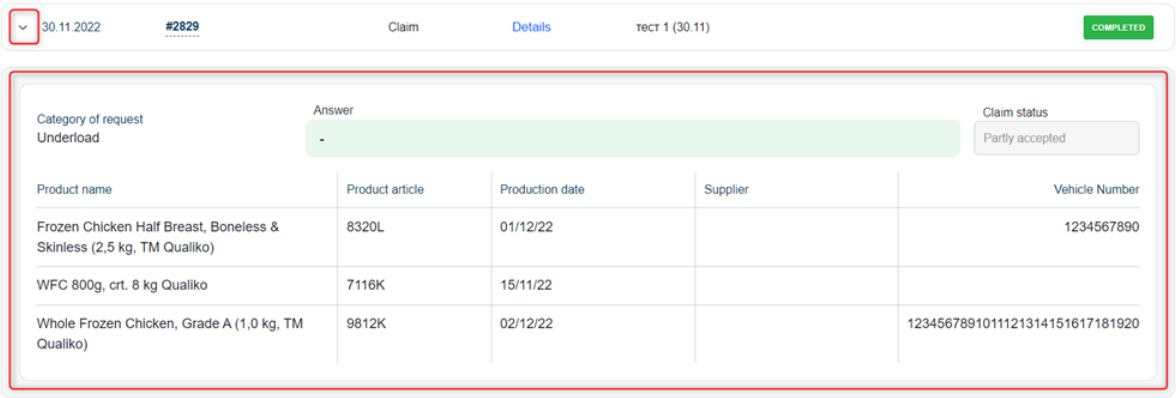

3. Find the necessary request/complaint in the list using filtering

All records on the main page have a date of creation, a number, information about the service and the object of the request, and a status that changes accordingly during the review of the request/complaint:

View information about the selected record in a short format, possibly by clicking on the arrow next to the date.

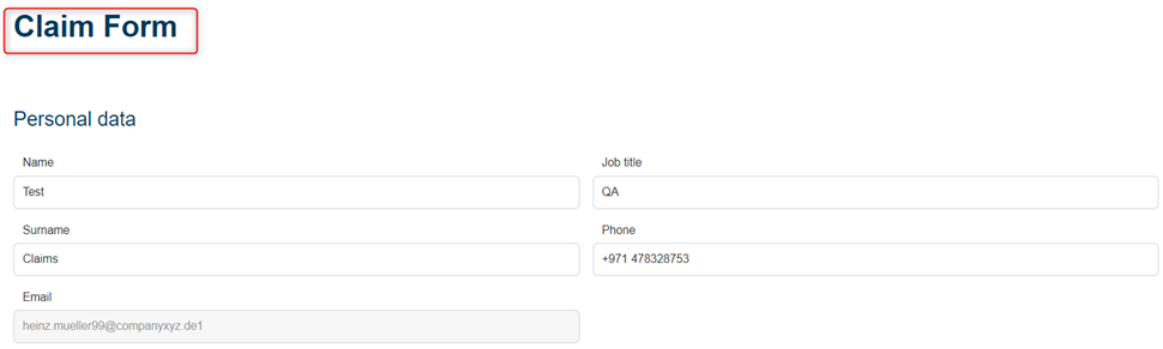

The company's response to the request (if available) is also displayed in a short form. The number of fields and content in the short form differs depending on the request.

By clicking on the inscription "Details", a transition is made to the page of the selected record, where, according to the fields of the form, the information provided by the author (portal user\customer\client) is displayed. The ability to edit and make changes is not possible.

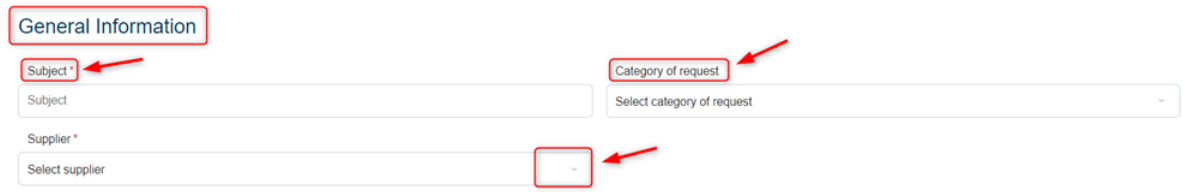

Forms for requests/complaints differ among themselves both in terms of the number of fields and their obligation to fill them out.

To start filling out the form, just click on the button with the form's name. For example "Claims Form"

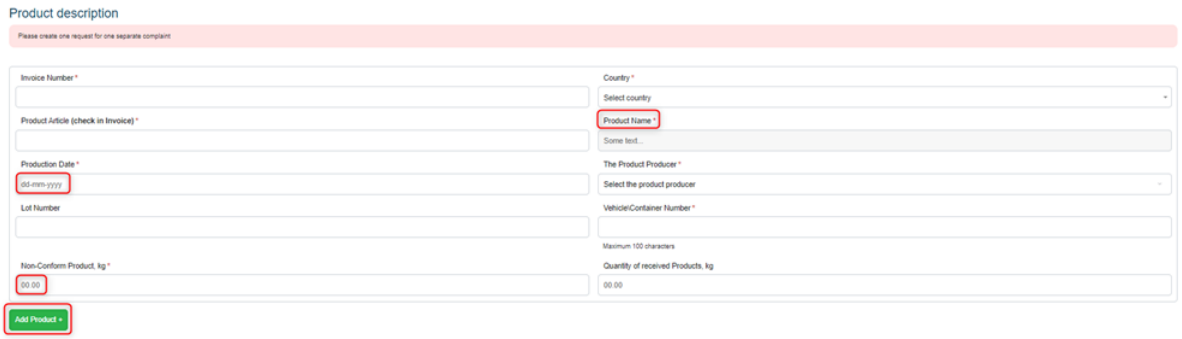

The block of information "Personal data" is the same in all forms. Information on the client is filled in automatically. All fields are editable except "Email".

The next block in the Claims Form is General Information

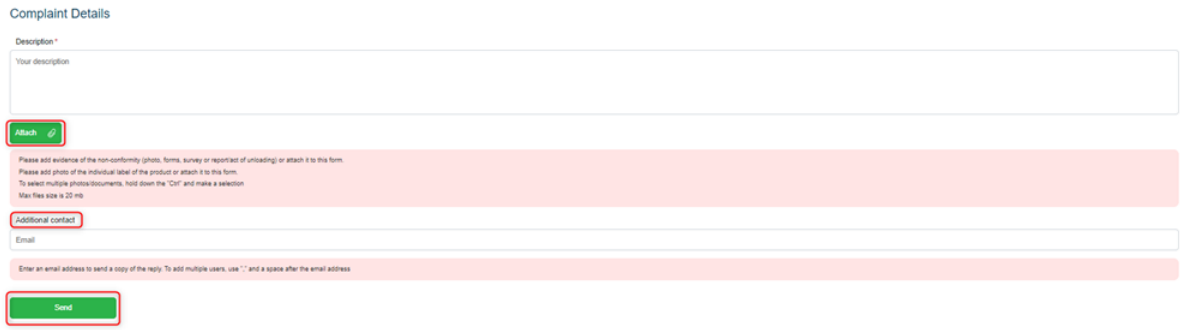

- If there is a "*" sign next to the field, it means that the field is mandatory, and if there is no information in it, the form will not be saved on the portal.
- The field next to which there is no "*" mark can be filled in as desired.
- When there is an arrow in the field for filling, it means that there is a list for selection in the field, and it is possible to fill it only by choosing one of the proposed values.

Block Product description:

- On all forms where the "Product Name" field is present, it is filled in automatically after filling in the "Product Article" field.
- In some fields there are hints on the data filling format, such as the date, where the system will set the separators, or the weight, where the separator is a dot, after which it is possible to specify 4 more characters.
- The "Add Product" button allows you to add up to 10 products to 1 request form.

Complaint Details block:

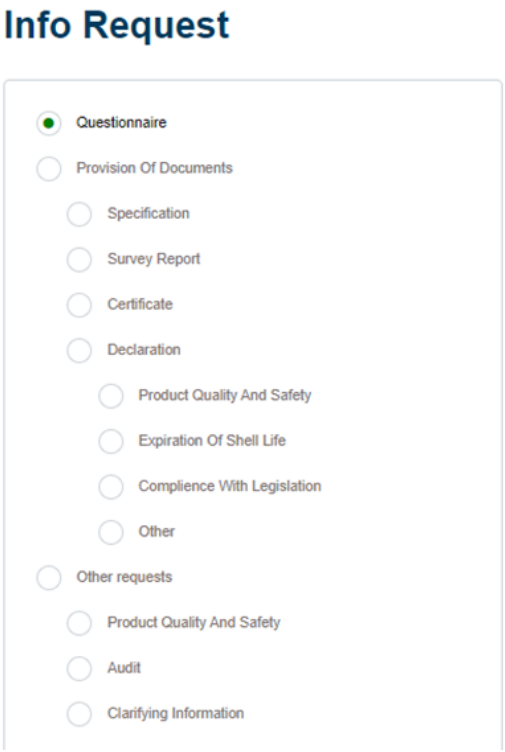

- Depending on the form, the "Description" field may be required or optional. Text field without punctuation and language restrictions. It is recommended to use up to 1000 characters.
- The "Attach" button allows you to add files. After saving the form, it will also be possible to view the files when opening the form by clicking "Details".
- The "Additional contact" field is a field for adding an e-mail to which, if necessary, a copy of the response to the request should be sent.
- "Send" button - when pressed, the form with filled fields is saved and automatically forwarded to the responsible employees for consideration. The form will not be saved if at least one of the required fields is not filled in.

Info Request form

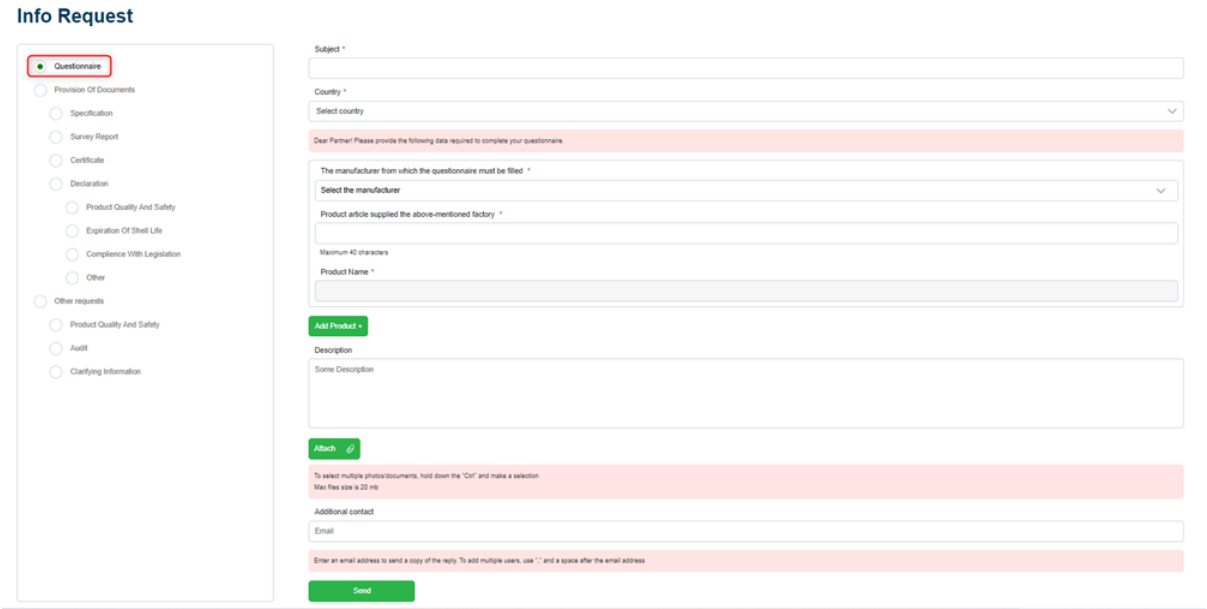

The block of information "Personal data" is identical in all forms.

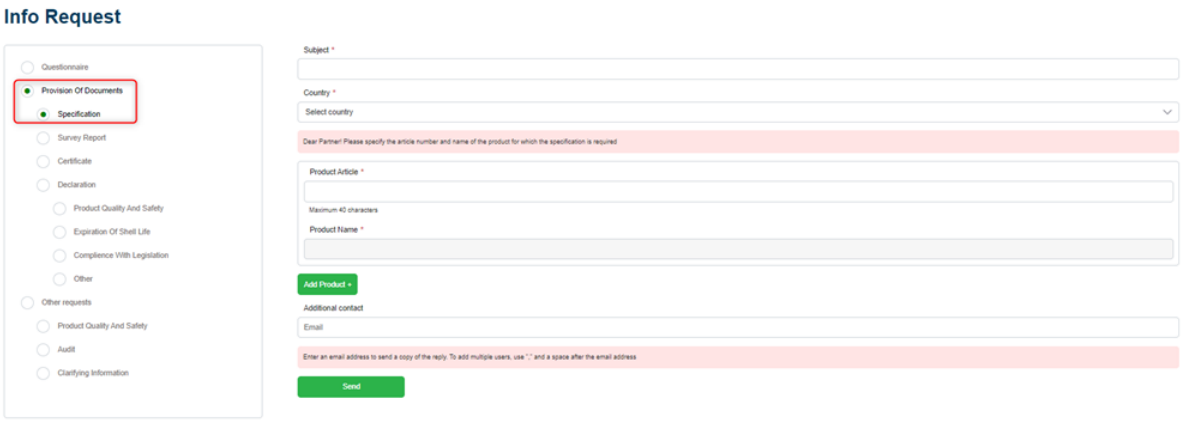

In the form, it is possible to choose the direction of the application.

The appearance and content will also change depending on the selected type of form. The principle of filling the fields and their algorithm remains similar to that described in the "Claims Form".

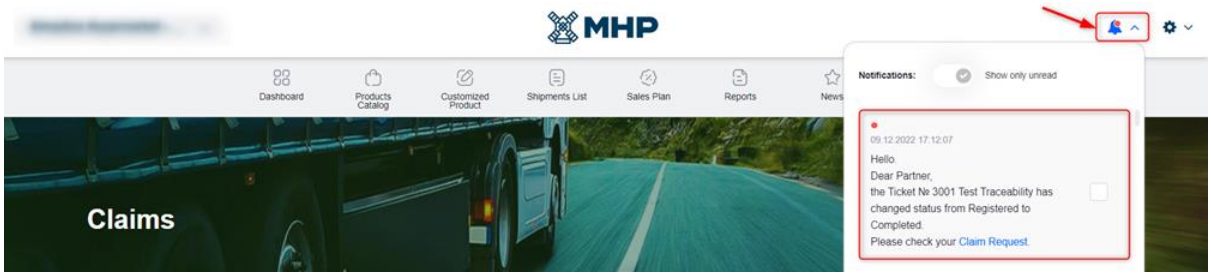

For example, several forms:

After saving, the forms are processed by responsible employees. The user will receive a notification in the bell about each change in the status of the request/complaint.
